EDITORIAL PREFACE

HISTORICAL NOTE: In 1893 there appeared the *Catalog of the "A. L. A." Library; 5000 volumes for a popular library selected by the American Library Association and shown at the world's Columbian Exposition. Washington: Government Printing Office, 1893.* The volume was published as "Whole Number 200" U. S. Bureau of Education. Commissioner William T. Harris, in his letter of transmittal, states that "The public library has become one of the most important of our educational institutions" and that "our people are justly proud of the American Library Association, which, by its zeal and practical energy, has done so much to devise means for the successful management of libraries." In the Introduction the committee (J. N. Larned, chairman) responsible for the selection "would disclaim the idea that this is a model library, in the sense of being an ideal selection. The wealth of material and the differences of opinion are such that no such selection is possible. They would claim, however, that it is a good working library, representing the best thought of competent judges in various departments. No board of trustees would make a mistake in ordering the collection as it stands." The cataloging was done in the New York State Library under the supervision of Mrs. S. C. Fairchild. The selection was made by the above committee which passed upon the suggestions of about seventy-five libraries and specialists. In this first edition there were no notes.

In 1904 there appeared a revised and enlarged edition, *A. L. A. Catalog; 8000 volumes for a popular library, with notes.* This volume was prepared by the "New York State Library and the Library of Congress under the auspices of the American Library Association Publishing Board" with Melvil Dewey as Editor and May Seymour and Mrs. H. L. Elmendorf as Associate Editors. The purpose of the *A. L. A. Catalog* was stated as sixfold; it would serve: 1, As a guide to bookbuyers whether for private or public libraries; 2, As a guide to readers in choosing what books they might best take from the library or from their own shelves; 3, As a manual to teach the younger and prompt the older librarians or booksellers in answering most wisely the constant inquiry for the best book on a given subject; 4, To take the place of the printed catalog in small public libraries; 5, As a most convenient catalog for private libraries, by checking in the margin all books owned; and 6, As a check list of books read, personal notes being added in margins. The catalog has been justified in making all these claims, by its constant and universal use. It has been the guide and counselor of thousands of librarians, and its scholarliness of selection has been amply proven by the fact that the individual titles in great proportion are still considered essential to any collection.

In 1912 and in 1923 appeared the two supplements which purposed to bring the selection up to date (1921). The first, 1904-1911, was compiled under the editorship of Elva L. Bascom; the second, 1912-1921, under that of May Massee; both were prepared under the supervision of the American Library Association in its offices and both were published by the Association.

In all of these undertakings the work was carried on while the editors were busy with their regular duties. A fine professional spirit, scholarly eagerness to

produce the best possible guide, and the wide range of generous cooperation fro specialists other than librarians all contributed to make the *Catalog* a publicatio extremely worth while to all libraries and to many individuals.

The present edition (1926) is the first to have had the concentrated attention o an editor, with such assistance as should be necessary to the compilation of a volum which would go back to the beginning, select, revise and add, until a completely new selective publication should be produced covering the entire range of literature on al subjects of all time. The carrying out of such a project was made possible by a specia grant from the Carnegie Corporation.

Apologia pro vita sua: For the many shortcomings in literary technique and scholarly expression we humbly beseech forbearance. To reduce to ten thousand entries, a compiled card catalog of some fifty thousand items, made up of materia from innumerable lists plus the "added suggestions" of over four hundred indivi is a large contract under any circumstances; to accomplish it [illegible] satisfaction to those possessing a sense of scholar[illegible] So far as it has been humanly possible, within th[illegible] achieved success in that we believe it to be an [illegible] compilation which will prove indispensable as a basic tool for [illegible] for some years to come. The following descriptive outline serves as a brief account of the background, development and purpose of this edition which will, it is hoped, prove its right to join the ranks of its predecessors.

Descriptive note: The *Catalog* aims to represent basic material listed under approximately ten thousand main entries, with other titles or editions mentioned in the notes wherever it has been deemed advisable to inform the purchasing librarian of comparative values, or varying advantages. No works in foreign languages have been included, but untiring, although often fruitless search has been made for the best translations of all classics, and of recent material which should be included. Every effort has been made to obtain and record the very latest data necessary to facilitate book ordering. As to the annotations, the main endeavor has been to give a definite idea of the content of the individual book, a set of volumes, or a unified series. The forms of these notes are as diversified as the multifarious sources from which they have been drawn, or as the individual bents of the special annotators. It [illegible] been impossible within the limited time, for the editor to recons[illegible] thousand notes according to the form which she might deem best[illegible] ous editing, revision or construction has been carried on for m[illegible] variety of forms is preferable for this type of catalog. From the [illegible]sher's blurb and Grub Street's purple patch to the reviewer's involved paragraph, not forgetting the librarian's brief phrases—all are in evidence. We trust, however, that there are no red or yellow streaks. No credit has been given for any material used; this being in accord with instructions received from the Editorial Committee, which agreed as a body that the process would be far too involved. The very full author, subject and title index with direct references to items of entry, by means of serial numbers, is planned to serve as a key to the classified catalog, for reference worker, cataloger, and order department.

Staff: Cooperating. This body is really beyond actual count, but the amount of correspondence carried on in connection with the tentative lists sent out for checking, with requests for added suggestions, would indicate a number approaching five

hundred, including specialists of every kind whose cooperation was desirable because of educational, professional or technical business interests. This large body grew by natural and unforced progression from sixty-five names first suggested at a meeting of the Editorial Committee of the Association, at which the editor asked for such a nucleus of specialized sources. The total background of authoritative opinion may be roughly grouped and approximately estimated according to source as follows:

Special departments in colleges and universities including theological schools	62
Libraries in such institutions	10
Public libraries comprising returns from many specialists in departments	21
Special libraries	21
Government department libraries and special institutions and societies at Washington	15

To these various sources must be added the 123 specialists suggested by the Washington office of the American Council of Learned Societies, through the Secretaries of the constituent societies. The response from all, throughout the months of correspondence, was prompt, generous and most gracious.

Beyond this there were many prominent individuals, among librarians, other professional workers and business specialists whose valuable assistance was given.

The Library of Congress gave invaluable service. During the months spent in Washington when special quarters were set aside for the Catalog staff, thousands of volumes were consulted. The perfect orderliness with which this flow of books was kept moving made it possible to have at hand the material needed at any given moment. The Card division kept abreast of the steadily growing compilation in supplying the necessary cards. That division also carried on the checking of the galley proof for all L. C. numbers after the staff had returned to Chicago for the publishing of the *Catalog*. All service was most complete in every way, and the generous courtesy never failing.

The A. L. A. Booklist office without whose files the *Catalog* could not have been compiled showed a spirit of forbearance and understanding which was particularly appreciated because the pressure of work there is always such that not a moment can be lost from the regular editorial procedure.

Emily V. D. Miller, Editor of publications, and her staff gave unsparingly of their time and energy, during the period of printing, in order that the *Catalog* might be issued, according to agreement, at the time of the semi-centennial conference of the Association. Frieda C. Wronker, proof reader at the printing house, showed a zeal and an intelligent interest far beyond any commercial requirements. She did much to make the date of publication possible.

Without the alert and interested response of the publishers to the voluminous correspondence concerning the latest and most complete trade information the entries would have been of very much less value for accuracy of necessary purchasing data. Lists of publications were sent to a large number of houses and were checked according to directions and returned with valuable added information. Beyond this, innumerable letters were written concerning groups of, or individual publications,

response to which was prompt and satisfactory. The cooperation on the part of all publishers was always most considerate and generous.

Staff: Special. As the work progressed it was necessary to obtain the services of individuals to take over certain sections for annotating purposes, working either reconstructively or originally upon the material already gathered together. These assistants were Emma Felsenthal, whose chief work was the selection of the fiction list; Ina Clement, whose specialized knowledge of and experience in municipal reference work was applied to certain sections; Robert James Usher, whose gratuitous expert advice and assistance in reducing the mass of scientific and technical material to the best possible selection within the limited number of titles assigned to those subjects was invaluable; Mrs. Usher, who added to that final selection, notes, and latest trade information; Jean M. Sexton, who was responsible for several classes, having worked with the Staff for six months; Rae Stockham, whose chief responsibility was descriptive work and bibliographic searching in the Fine Arts, and a good part of Philosophy; Frances H. Bickford, who endeavored to perform a large task in one month, that of characterizing the greater portion of the 800s; Mary K. Reely, who worked upon the annotations in the various drama groups, and adult fiction; Alice L. Jewett of the Board of Education for Librarianship, who was released to assist the Catalog staff during the weeks immediately preceding publication. Jessie Gay Van Cleve as editor of the Children's section had complete charge of that part of the *Catalog*.

Staff: Regular. Ruth Montgomery, special cataloger, who worked with the staff one year, put through the tremendous task, with its innumerable associated details, of adapting all Library of Congress cards to final forms of entry, at the same time directing the making of the index, and beyond that giving general and special assistance wherever it was most needed. Rose C. Magsamen, Secretary to the editor for the entire two years, rendered unique and valuable service to every individual assisting and to the *Catalog* as a whole. She, of necessity, proved her ability as a reference worker, and bibliographer, trade specialist and meticulous editor of fine points, as well as an invaluable secretary. To Dorothy Bright, chief cl[illegible] ant, much credit is due for her quick, alert, steadfast and intelligent work.

Acknowledgment: Appreciative. The editor extends her most [illegible] appreciative thanks to all individuals and organizations whose generous [illegible] and encouraging confidence has made this large undertaking a delightful pleasure; not forgetting those who assisted in forming that essential background represented by the previous editions and supplements. She earnestly hopes that a useful tool has been created which may be of basic value for some years to come.

CLASSIFIED LIST OF BOOKS

EXPLANATORY NOTES

The classification used is the Dewey Decimal.

Entries have been based on information obtained from the Library of Congress cards.

Series notes and editions are given in parentheses after the title.

Date of publication is that of the latest edition or printing, not that of original publication. Dates have been omitted from Fiction.

Pagination. Because of the variation in the method of counting, this has been omitted when the edition listed has not been seen or is not in the Library of Congress.

The publisher listed is that from whom the book may be obtained. The name is given in abbreviated form which may be identified readily in the Directory of publishers at the end of the *Catalog*. English publishers of imported books are frequently given—preceding the American firm. The publisher of a title mentioned in the annotation has been omitted when it is the same as the one in the main entry.

The latest price obtainable from the publisher is quoted. For works in more than one volume the price quoted is for the set unless the price per volume is stated. Some of the out-of-print items that have been included may be reprinted.

The Library of Congress card number is given at the lower right corner of each item. The number enclosed in curves ( ) indicates that the card is for an edition with a different publisher. The number enclosed in brackets [ ] indicates that the card is an open entry, covering a series or a set.

The serial (index) number is given at the lower left corner of each item.

Suggested subject headings are at the end of each annotation. They follow the Library of Congress form although simplified in some cases. The following abbreviations have been used:

Antiq.	Antiquities	Gt. Brit.	Great Britain
Bibl.	Bibliography	Hist.	History
Biog.	Biography	Pol. & govt.	Politics and government
Descr. & trav.	Description and travel	Soc. life & cust.	Social life and customs
Disc. & explor.	Discovery and exploration	Soc. condit.	Social conditions

Book review digest, Jan. 1906 to date. Wilson (see note)

A digest and index of selected book reviews in over sixty English and American periodicals. Arranged alphabetically by author of book reviewed, with subject and title index. Gives author, title, place, publisher and price, a brief descriptive note, quotations from selected book reviews with exact reference to periodical in which review appeared, and references to other reviews. Indicates length of review in number of words and whether favorable or unfavorable. From the public library point of view and primarily useful in the selection of books. Monthly; with a semi-annual cumulation in August, and an annual cumulation in February which forms an annual volume, issued in book form.

The subscription for one year includes ten numbers for $8, with bound annual cumulation for $6. Libraries wishing both may get them for a combined rate of $12 a year.

To aid libraries buying fewer than 400 books a year a selection of titles is made with the cooperation of librarians and published as the *Standard catalog bimonthly* (Wilson $1 a year) with the same information that is given in the fuller digest. The entries are classified according to Dewey. It appears six times a year with an annual cumulation.

Evans, Charles, 1850– American bibliography. 1903-1925. v.1-9. Author $25 each

A chronological dictionary of all books and pamphlets and periodical publications printed in the United States of America from the genesis of printing in 1639 down to and including the year 1820 with bibliographical and biographical notes.—*Subtitle.* "Each volume approximates 500 pages, and contains besides full titles, imprints, collations, the initials of such libraries as possess copies of the books themselves; and an author index—the arrangement being chronological; a classified subject index of much practical utility to librarians; and an index of printers and publishers which in itself constitutes a typographical gazetteer of early printing and printers in the United States." The publication has been biennial except for the period of the war, and is now being resumed for the forthcoming volumes; volume 9 having been issued in 1925.

Another monumental work of broader scope in that it includes all books, pamphlets and periodicals about America not only those printed here but also in other countries is *A dictionary of books relating to America from its discovery to the present time.* Parts 1-72 were edited by Joseph Sabin, parts 73-116 by Wilberforce Eames, all comprising volumes 1 to 19 and part of volume 20. The Bibliographical society of America is now trying to complete the work under the editorship of Mr. Eames.

Hasse, Adelaide Rosalie, 1868– Index of economic material in documents of the states of the United States; prepared for the Carnegie institution of Washington. 1907–22. 13v. in 16.
Carnegie institution (see note)

"This index deals only with the printed reports of administrative officers, legislative committees, and special commissions of the states and with governors' messages, in whatever form they have been published, for the period 1789-1904. It undertakes to supply a reference by volume and page to all material of economic importance which they contain. The word economic has been interpreted very liberally to include almost any aspect of American history. The indexing is by rather general headings and broad subjects."

Public affairs information service. Bulletin, a cooperative clearing house of public affairs information, 1914 to date.
Wilson (see note)

The following statement was made by an official of the Public affairs information service:

A weekly bulletin (semi-monthly in July and August) which is cumulated quarterly and annually. Each cumulation, except the July issue, supersedes the previous weekly and cumulated bulletins of the year. The July cumulation is a supplement to the cumulation for April. The annual cumulation is a substantially bound volume.

A subject index to American and foreign publications, in English, relating to all economic and social topics of current interest, with particular emphasis on their practical aspects. It includes books, periodical articles, papers in the proceedings of professional, trade, and labor associations, official publications, pamphlets, and typewritten compilations by several legislative and municipal reference libraries. The 1925 volume contains references to articles in over 700 periodicals, besides analytic entries referring to chapters in books and papers read before many associations. Most of these items are indexed nowhere else, and many of the periodicals indexed have even no annual index of their own.

The wide range of material and subjects covered makes the P. A. I. S. valuable to libraries of all types and sizes. It is a guide to a vast amount of statistical information, it is an index to American and foreign legislation (in its field) and it lists not only the more prominent new books, but others of obscure or foreign publishers. It also mentions many books and pamphlets which may be secured free upon application.

Subscription to the weekly and cumulated bulletins $100 a year. New subscribers at this rate will be presented with a complete set of annuals, 1915 to date, so long as they remain in print.

The five cumulated issues are sold on a service basis, at rates varying from $12.50 to $50.

Supt. of docs. 20c

After a list of bibliographies on child labor and related subjects the general divisions are United States and general; Foreign countries; Industries; Accidents; Health; Educational aspects; Juvenile occupations, guidance and placement. Two very complete indexes are added,—author and subject. The bulk of the references listed is of course of the bulletin, report, document, proceeding and journal type with comparatively few books. But it is exactly this gathering together of illusive material which makes the publication valuable. There are 1826 entries. A supplementary list has been compiled covering the years 1916–24. The same plan is followed for the 1876 entries included. It may also be obtained from the Supt. of docs. for 20c.

U. S. Bureau of education. List of books for a teacher's professional library, a classified list of 100 titles; comp. by E. A. Wright. (Teachers' leaflet No. 17) 1924. 15p. Author 5c

A classified list of 100 titles which like the earlier list (1909) is not intended as a "best books" group but merely as representative of the material of interest to those engaged in educational work. It is the result of the responses from educators and librarians asked to give opinions on tentative lists. The selection is restricted to works in the English language referring mainly to conditions in the United States, preference having been given, where feasible, to recent publications. The list does not include the publications of the Bureau of Education which it is taken for granted are in every pedagogical library. The titles are fully annotated.

U. S. Superintendent of documents. Catalogue of public documents of Congress and of other departments of the government of the United States, being the "Comprehensive index," 1896 to date.
Supt. of docs. Prices vary

Each volume in this series includes all Congressional and departmental publications issued during the Congress. Arranged in dictionary form it includes authors, titles and subjects, and many analytics. Full catalog information is given for each entry. The *Monthly catalogue of the United States public documents* (free to libraries) is a current continuation, listing all publications of the month by issuing office, with a detailed, satisfactory annual

index. These two titles continue Poore and Ames (above). This office has also compiled a *Checklist of United States public documents, 1789–1909* ($1.50). Here all of the documents of the period are classified according to the offices by which they were issued. A very brief historical note of the bureau precedes the list of its publications. A complete set of a series is described by volume and number,—few titles are mentioned. Volume two has never been published. Useful for quick reference are the *Price lists* issued by this same office. They contain a list of available documents on a variety of topics of current interests. The 72 pamphlets in the series are revised frequently.

Dutcher, George Matthew, 1874– and others. Guide to historical literature. 1926. Macmillan, In press

A selected, classified, critical bibliography of the whole field of history, including all parts of the globe in all ages, centering attention on the great cultural nations in the periods of their greatest importance. Besides the usual works on political history, writings in diplomatic, military, constitutional, economic, social, religious and cultural history are included. There are also carefully selected lists of biographies.

The selection of titles and the criticism of the books represent the judgments of competent specialists. The editorial committee has given most painstaking care to the classification and accuracy of the data presented.

Prepared at the suggestion of the American library association to meet the demands of librarians and the general reader, it nevertheless gives special attention to the needs of the student who is specializing in history. For his use not only additional titles but also additional classes of books have been included.

"The work is not a new edition of Adams' *Manual of historical literature.* It is entirely a new work which, the editors hope, will serve the purpose of the present generation as Adams' work did an earlier generation."

The Committee on bibliography of the American historical association which compiled this valuable historical aid is composed of: George Matthew Dutcher, chairman, Henry Robinson Shipman, Sidney Bradshaw Fay, Augustus Hunt Shearer, William Henry Allison.

Encyclopedia Americana. 1925. 30v. illus. ports. maps. Ency. Amer. co. $180

First edition, 1903-04, 16v., unpaged; several partial revisions, especially an edition in 22 volumes, published in 1912 under the title *The Americana*, which included some new articles and changes in other articles. The 1918-20 edition is a complete revision, reset throughout with much new material. The five reprintings since 1920, including that of 1925, have been revised, especially the biographical and statistical material, and some new articles added.

A good up to date general encyclopedia covering much the same ground as the *New International*, but stronger in the fields of science and technology and their recent developments. Important articles are by specialists, are signed and in general are excellent. Illustrations are numerous and good, pronunciation is marked and there are numerous short articles on small subjects, including many biographies of people still living.

The set is available in a fabrikoid binding for $210.

New international encyclopedia; ed. by F. M. Colby and Talcott Williams. Ed.2, rev. 1922. 25v. illus. ports. maps. Dodd $156

First edition 1902-04, in 17 volumes. A later edition not entirely revised but with new material and new maps was published in 1907 in 20 volumes. Another partial revision in 1912 incorporated the population figures of the United States census of 1910. The second edition, 1914-16, is thoroughly revised and reset. The 1922 issue is printed from the same plates, with some changes throughout and the addition of volume 24, containing a history of the war, latest census figures, and courses of reading.

Two supplementary volumes appear in two editions. The volumes numbered 1 and 2 supplement the original second edition published in 1914-16. Volumes numbered 24 and 25 supplement the present subscription edition (the 1922 revised reprint of the 2d edition). Volumes 24 and 25 are identical with volumes 1 and 2, except that volume 25 has bound with it the "Courses of reading" which is not included in volume 2, being already part of the 1914-16 edition.

The encyclopedia has been re-issued in 1925 in a cheaper edition of 13 volumes made up of the original 23 volumes and the two supplementary volumes rebound in double columns. There is no change in text but this edition is sold for $105.

An encyclopedia of the best modern type, with adequate and authoritative articles, many good illustrations, and excellent and very useful bibliographies. Important articles are by specialists, though all articles are unsigned. Especially good for biographical material, with a considerable proportion of Latin-American biography. It includes

numerous high grade maps, so mounted that they can be removed and replaced by revised maps to be issued as the need arises and supplied free to subscribers who purchased their sets before 1918.

Encyclopaedia britannica. Ed.11. Cambridge ed. 1910–1922. 32v. illus. ports. maps. Encyclopaedia britannica co. $186.27

The most famous encyclopedia in English and for some purposes the best. The first edition was published in 1771 and the ninth edition in 1875-88; the tenth edition, published 1902-03 was not a revision of the whole work but merely a 10 volume supplement to the ninth edition issued to bring that edition more nearly to date and linked to it by a general index, volume 35. The eleventh edition is based on the ninth and tenth editions but revised throughout, rearranged to make the smaller subjects more easily accessible and much new material added. Noted for its long signed articles by specialists with excellent bibliography appended to most articles, and its many excellent illustrations.

Also issued in the New form edition, 32 v. in 16, cloth $97.60. The contents are identical with the Cambridge edition.

050 Periodicals. Indexes

Magazine subject-index; ed. by F. W. Faxon, 1907 to date. Faxon, prices vary.

The first volume of this publication is a subject index to seventy-nine American and English periodicals from their first issues through 1907. It is intended as a supplement to other indexes and therefore includes no periodicals indexed elsewhere. The whole list is general in character but emphasizes history, travel, out-door life and fine arts. It is continued by the *Annual magazine subject index* which is compiled with the same idea of supplementing the larger indexes. Part 2 contains the *Dramatic index* (016.7).

Poole's index to periodical literature. Abridged ed. by W. I. Fletcher and Mary Poole. 1901. 843p. Houghton o.p.

A condensation of *Poole's Index,* the pioneer index and, though no longer continued, still a very important index to American and English periodicals, since it covers the longest period, one hundred and five years. This abridgement includes references to thirty-seven popular periodicals still published, to the end of 1899. Designed especially for the small library, but of value to all libraries large or small, on account of its one alphabet and the fact that it gives references enough for all ordinary work. The supplement covers from 1900 to 1904.

Readers' guide to periodical literature, 1900/04 to date. Wilson (see note)

A cumulative index, made up of permanent cumulated volumes, annual volumes, and monthly issues, cumulating quarterly until the last or December number forms a new annual volume. Started in 1901, in 1903 it absorbed the *Cumulative index,* and in 1911 it took over the work of the *Annual library index.*

A modern index of the best type. Its special features are: full dictionary cataloging of all articles; uniformity of entries; use of catalog subject headings; up-to-dateness. Early volumes indexed books and book reviews as well as periodicals.

Cumulated volumes: v.1, 1900-1904, o.p.; v.2, 1905-1909, $24; v.3, 1910-1914, $32; v.4, 1915-1918, $27; v.5, 1919-1921, $35; v.6, 1922-1924, service basis.

070 Journalism. Newspapers

Ayer and son, firm, publishers. American newspaper annual and directory; a catalogue of American newspapers, 1880 to date. Ayer $15 (1926)

This annual now fifty-seven years old, because of its absorption in 1910 of Rowell's *American newspaper directory,* first published January 1, 1869, has come to be an extremely valuable reference work in that the information given in connection with the publications listed makes it an excellent gazetteer with up-to-date maps all particularly valuable to the business man. This edition lists 22,190 publications, including beside the main lists of newspapers and periodicals grouped by states, special groups of dailies, Sunday, monthly, weekly, religious, agricultural, trade, technical and other types of serial publications which need to be classed in this manner for reference use.

Maulsby, William Shipman, 1890– Getting the news. 1925. 310p. Harcourt $2.25

A suggestive, informal discussion of the aims and practices of the modern newspaper and the work and duties of the cub reporter. It treats news gathering, the various types of stories, pictures, handling the beat and writing the news. The author was formerly on the staff of the Springfield *Republican.* A very practical book is that by R. W. Neal, *News and news writing* (Home correspondence school, Springfield, Mass., 1925. $2). The author is director of instruction in the school and treats his subject in textbook style, with extremely definite paragraph division and many Exercises at the end of each chapter. It is a study book for the "cub-to-be."

Hibben, John Grier, 1861– Problems of philosophy. 1898. 203p. Scribner $1.50

This is an introduction well adapted to meet the needs of beginners. After an enumeration of the chief philosophical problems, come eight special chapters dealing with Being, The world, The mind, Knowledge, Reason, Conscience, Political obligation and The sense of beauty. The chapters are not arranged to bring out the inter-relation of the various philosophical disciplines.

The author aims to present a bird's-eye view of the whole field of philosophy, keeping in the background his own personal views, and assuming no previous knowledge on the part of his reader. In four parts he considers: The historical definition and divisions of philosophy; The different philosophical systems; Principal directions and distinctions of philosophical thought; and, The true definition and systematization of philosophy in the light of the past. The original German edition was published in Leipzig in 1895. The first American edition was published in 1897.

Montague, William Pepperell, 1873– Ways of knowing; or, The methods of philosophy. (Library of philosophy) 1925. 427p. Allen; Macmillan $5

It is the purpose of the author, professor of philosophy at Columbia University, to set forth the methods of logic and epistemology disentangled from the more exciting problems of metaphysics. The material is grouped in two sections: Part 1. Ways of attaining knowledge; The six methods of logic. Part 2. Ways of interpreting knowledge; The three methods of epistemology. The Postscript, The knower and the known; A dialogue, seeks to present in active discussion the theories of the various schools and their proponents. Four characters represent objectivism, subjectivism, dualism and realism.

Thilly, Frank, 1865– History of philosophy. 1914. 612p. Holt $3

A study of philosophical theories in relation to one another, the time in which they were produced and the thinkers by whom they were offered, considered under three broad divisions: Greek philosophy, Philosophy of the middle ages, and Modern philosophy. Valuable as a textbook as it is concise, well-proportioned and comprehensive, giving adequate recognition to English, French and American philosophy. Webb's *History of philosophy* (Home univ. lib. 110—120 Metaphysical topics

Bergson, Henri Louis, 1859— Creative evolution; tr. by Arthur Mitchell. 1911. 407p. Holt $3.50

"Thesis is, roughly, that the intellect, which is useful in the sphere of inorganic matter, where effect follows cause mechanically, is helpless in the presence of life. Evolution is in its essence creative; it cannot be explained by the thing evolved, which is a halting-place in a continuous movement. But each individual carries the secret, and it is in his instinct, intuition, or whatever we care to call that faculty which is individual to him, that we must look for the secret of the creative movement, which is life. Bergson's philosophy is still in the making. Its merit is not in the conclusions, but in the process, which compels us to rethink all our creeds, and to leave our well-furnished house of thought and, staff in hand, to take to the high-road."

Baudouin, Charles, 1893– Studies in psychoanalysis; tr. by Eden and Cedar Paul. 1922. 508p. Dodd $4

"In the author's view analysis is a method of education or re-education rather than a curative method and its mission is to point the way to the transformation of suppressed instincts. The author's path of approach is the inductive method. Much space in the book is therefore given to case records from which he draws his conclusions." The deliberately conjoined use of suggestion and psychoanalysis is Baudouin's contribution as a pioneer in the field of therapy. His *Power within us* (Dodd, 1923. $1.50) is a semipopular study of moral energy.

This Oxford medical publication is specially noteworthy as it summarizes theories and applies them to neurosis and normal life alike. It illustrates from biographies of authors and characters of literature. A less pretentious work and rather loosely written, is Lay's *Man's unconscious conflict* (Dodd, 1917. $2) which is a popular but exhaustive study of psychoanalysis. The chapter on Two kinds of thinking is especially good. Barbara Low's *Psycho-analysis* (Harcourt, 1920. $1.60) quotes more extensively from Freud than these other works. Her chapters on Repression and on Social and educational results are full of suggestions for parent, teacher and social worker. Her lucid crisp style makes the book very readable.

This is a popular explanation of psychoanalysis for the student and layman which emphasizes what psychoanalysis cannot do, and refuses to exploit the sensational aspects. It is interesting as an exposition by a doctor who is probably the foremost American psychiatrist. Coriat's *What is psychoanalysis?* (Paul, 1919, 3s6d) while less full is a clear exposition of the general procedure of psychoanalysis in the form of questions and answers.

Coriat, Isador Henry, 1875– Repressed emotions. 1920. 213p. Brentano's $2

Defining emotional repression as the defense of conscious thinking from mental processes which are painful, the author goes on to explain the nature of repression, its relation to the unconscious, the part it plays in mental disorders and the manner in which it may be treated through psychoanalysis. He lays special stress on the fact that psychoanalysis is largely educational since it serves to further the development of character.

Freud, Sigmund, 1856– General introduction to psychoanalysis; tr. by G. S. Hall. 1920. 406p. Boni & Liveright $4.50

"These twenty-eight lectures to laymen are elementary and almost conversational. Freud sets forth with a frankness almost startling, the difficulties and limitations of psychoanalysis, and also describes its main methods and results as only a master and originator of a new school can do." There are four lectures on the psychology of errors, eleven on the dream, and the remaining on the general theory of the neuroses. Other studies written by the author more for the doctor or specialist are: *Delusion and dream* (Dodd, 1917. $3) *Psychopathology of everyday life* (Macmillan, 1917. $4) *Interpretation of dreams* (Macmillan, 1915. $4) *Delusion and dream* (Dodd, 1917. $3) *Totem and taboo* (Dodd, 1918. $4) *Wit and its relation to the unconscious* (Dodd, 1916. $4) *The neurotic constitution* (Dodd, 1917. $5)

Psychoanalysis

270 20–12205

Green, George Herbert. Mind in action. 1924. 223p. Putnam $2

A popular study of psychoanalysis reduced to its simplest terms and interpreted with the purpose of giving the practical man with no knowledge of psychological principles an insight into his own motives and behavior. It begins with a discussion of instinct, suggestion and autosuggestion and continues into an exposition of psychoanalytical theories concerning day dreaming, bias, dreams, memory, forgetting, repression, fears, and identification. The author's *Psychanalysis in the classroom* (Putnam, 1922. $1.75) is an illuminating book for the teacher and parent on the contribution of psychanalysis to psychology, based upon a large number of children's cases, the greater part within the realm of the normal. A brief annotated bibliography is included.

Myerson, Abraham, 1881– Foundations of personality. 1921. 406p. Little $2.25

An endeavor to understand the fundamental forces of character and to trace the threads of conduct back to their origin in motive, intelligence, instinct and emotion. The author, a practicing neurologist, aims to show the less obvious motives that affect human action, and finds the seat of all mental activities in the organic activities of the body. It shows the influence of the Freudian psychology, but disagrees strongly with the extremes to which its enthusiasts carry it.

Tridon, André, 1877– Psychoanalysis; its history, theory and practice. 1919. 272p. Huebsch $2

This book is more valuable than the usual popular exposition of psychoanalysis, since it summarizes on all important points the views of Freud, Jung, Adler, White, Jelliffe, Kempf, Jones and others who are working in this field. It is better for those who have some idea of the fundamentals of science as it is given more to comparisons than to elementary definitions.

Psychoanalysis

279 20–26326

Walsh, William Sebastian, 1890– Mastery of fear. 1924. 315p. Dutton $2

A helpful book for the chronic worrier, which gives a common-sense presentation of the part fear plays in human life, pointing out its causes, and classifying and analyzing various types—fear of illness, ridicule, old age, death—with suggestions for allaying them. It is written in a popular style. Another popular but reliable discussion is by E. H. Williams, *Our fear complexes* (Bobbs-Merrill, 1923. $2.50); it strikes a sane, mid-way position in regard to psychoanalysis and Couéism.

Fear

280 24–12129

Williams, Tom Alfred, 1870– Dreads and besetting fears. (Mind and health ser.) 1923. 217p. Little $1.75

The author who is a psychiatrist of wide experience supports the point of view that obsessive fear can be more often traced back to some unfortunate incident in childhood than to heredity, not however, by the method of psychoanalysis. He analyzes the various types of fears and describes the treatment by which they can be controlled and dispelled, illustrating freely from cases within his own experience. It is simple and popular in style.

132 Mental Derangements

Beers, Clifford Whittingham, 1876– Mind that found itself. Rev. ed. 1923. 411p. Doubleday $2

An account of the author's experiences during a two-year period of insanity, in a private sanitarium and an insane hospital, giving a detailed record of his mental processes and treatment. It is written in the hope of procuring wiser methods in treatment of the insane. Professor James says he has "handled a difficult theme with great skill and produced a narrative of absorbing interest to scientist as well as layman." First published in 1908 by Longmans, this edition omits about seventy-five pages of material no longer pertinent, and brings up to date the author's account of his work in the mental hygiene movement.

Prince, Morton, 1854– The unconscious, the fundamentals of human personality, normal and abnormal. Ed.2, rev. 654p. Macmillan $3

Selected articles from courses in abnormal psychology and papers published in the *Journal of Abnormal Psychology* are elaborated to form an introduction to the subject. The problems considered relate equally to normal psychology in that they are problems of psycho-physiological functions and mechanisms. It is a contribution that is valuable alike to the physician and psychologist and of great significance to the workaday man. Another scientific exposition summarizing the usual forms of mental abnormalities seen in such clinics as that of Bellevue, and discussing the particular social problems raised by them, is by I. J. Lovi, Henrietta. Best books on spirit phenomena, 1847–1925. 1925. 94p. Badger $2

About one hundred representative books are described in running narrative form, and represent belief, unbelief, and disbelief. The list is compiled from the viewpoint of a library worker and a student of spirit survival. The selection is excellent and the book, far from being a mere list, is entertaining, and non-controversial. It will be useful in all libraries especially as it is the first of its kind and is well written.

290 25–24685

McCabe, Joseph, 1867– Spiritualism; a popular history from 1847. 1920. 243p. Unwin; Dodd $3.50

A rational, clearly written and accurate statement of the case against spiritualism. The author describes case after case of communication through noted mediums. Believers may feel that too much attention is given to instances admitted to be frauds and not enough to those which have arrested the attention even of unbelievers. An informative book for those interested in the movement.

291 (21–5097)

Myers, Frederic William Henry, 1843–1901. Human personality and its survival of bodily death; ed. and abridged by L. H. Myers. 1920. Longmans $5

Largely a careful collection of evidence of the phenomena of psychical research, hypnotism, genius, sleep, spiritualism, thought transference and clairvoyance. This abridgment is much less interesting than the original two-volume work (1920. $15), which easily stands first in this field, and should be bought instead where demand warrants. The first edition published in 1903 included appendices occupying about half of each volume containing examples of phenomena analyzed.

Bousfield, Edward George Paul. Sex and civilization. 1925. 294p. K. Paul; Dutton $5

In this book Dr. Bousfield, a London neurologist and psychologist, assumes that the physical disabilities of women are largely mythical and that over-emphasis of secondary sexual characteristics makes for temperamental disability and waste of energy. His remedy for the existing evils due to artificial sex-differentiation is absolute equality of the sexes, not mere legal equality. An appendix by way of a criticism of Freud completes the volume.

136.7 Child study

American institute of child life. Guide book to childhood, by W. B. Forbush. Rev. ed. 1918. illus. Macrae-Smith $2.50

Part one consists of an outline of child life summarizing the best that is known about childhood; part two contains several hundred answers to questions, lists of books, plans and programs for parents' clubs. Although some parts are wordy and sentimental, it is on the whole, a good compendium on the subject. The first edition of 1913 was revised and enlarged in 1915. Hall, Granville Stanley, 1846–1924. Adolescence. 1922. 2v. illus. Appleton $10

This is still an authoritative work on the psychology of adolescence and its relations to physiology, anthropology, sociology, sex, crime, religion and education. In reality, it covers all problems of birth, growth and development from the dawn of life to maturity, and is a valuable store-house of facts and statistics. A condensation of this well-known work is *Youth; its education, regimen and hygiene* (Appleton, 1921. $2) A chapter on moral and religious training, and a glossary have been added. This briefer book will be more useful to the average student, teacher and parent. Both were first published in 1904.

Preyer, William, 1841–1897. Mind of the child; tr. by H. W. Brown. (International education ser.) 1888-89. 2v. illus. Appleton o.p.

This important study was the first systematic record of the mental development of a young child. It covers the first three years of life and traces the development of the senses in the order of their unfolding, the growth of the notions of space, time, and casuality, the advent of language and the development of self-consciousness. The author was professor of physiology at Jena. His skill in psychological analysis produced a valuable record particularly in the elaborate and painstaking history of the child's progress in the art of speech.

140 Philosophic systems

Adams, George Plimpton, 1882– Idealism and the modern age. 1929. 253p. Yale $2.50

Is idealism dead? The modern economic, scientific and democratic order has led us to assume an attitude of re-creating environment instead of accepting it as divinely immutable. The author of this thoughtful book shows that the new masterful spirit is but an effort to meet the possibilities of our world, that the fine idealism of Christianity and Platonism is not discarded by it.

James, William, 1842–1910. Pragmatism, a new name for some old ways of thinking. 1907. 308p. Longmans $1.75

An unconventional and picturesque presentation of pragmatism, which teaches that truth comprises all principles, ideas and beliefs that lead in the long run to the best practical results. Pragmatism is the same method in philosophy that utilitarianism is in ethics, which pronounces things right and wrong not by previous intuition but by the test of experience. The author's *Meaning of truth* (Longmans, 1909. $1.75), a sequel to *Pragmatism,* is a collection of sixteen papers, addresses and essays answering the objections raised against his philosophy of pragmatism. His *Essays in radical empiricism* (Longmans, 1912. $1.75) are all reprinted from magazines and his former works, except the essay on Absolutism and empiricism, which according to the editor, Professor R. B. Perry, is a connecting link between pragmatism and radical empiricism.

Lange, Friedrich Albert, 1828–1875. History of materialism and criticism of its present importance; tr. by E. C. Thomas, introd. by Bertrand Russell. (International library of psychology, philosophy and scientific method) Ed.3. 1925. 3v. in 1. K. Paul; Harcourt $5

This is a reprint of a monumental work which was first published in 1865, and revised by the author in 1873. It is of the highest value to all who wish to know what has been said by the advocates of materialism, and why philosophers have in the main remained unconvinced. The work is divided into two parts, one dealing with the times before Kant, the other with Kant and his successors.

The **New** realism: coöperative studies in philosophy by E. B. Holt and others. 1912. 491p. Macmillan $3

The program and platform of six realists first outlined in the *Journal of Philosophy* in 1910.

Contents: The emancipation of metaphysics from epistemology, by W. T. Marvin; A realistic theory of independence, by R. B. Perry; A defense of analysis, by E. G. Spaulding; A realistic theory of truth and error, by W. R. Montague; The place of illusory experience in a realistic world, by E. B. Holt; Some realistic implications of biology, by W. B. Pitkin. Another cooperative study defending the realistic faith but centering the program almost exclusively on the problem of knowing is *Essays in critical realism* (Macmillan, 1920. 10s) by Durant Drake, A. O. Lovejoy, J. B. Pratt, A. K. Rogers, G. Santayana, R. W. Sellers, and C. A. Strong.

Perry, Ralph Barton, 1876– Present philosophical tendencies. 1912. 383p. Longmans $3.50

A critical survey of naturalism, idealism, pragmatism and realism, together with a synopsis of the philosophy of William James. The author is Professor of philosophy at Harvard University. His work is valuable as discussing a great many confused movements in contemporary thought and as the first written from the standpoint of new realism. Its concise and admirable style makes a difficult subject pleasant reading for the serious student. The author's companion volume, *Present conflict of ideals* (Longmans, 1918. $4.50) deals with the moral, emotional, political and religious implications of the new realism. It comprises the lectures on the Mills foundation at the University of California.

Schiller, Ferdinand Canning Scott, 1864– Studies in humanism. Ed.2. 1913. 381p. Macmillan $3.50

A comprehensive and far-reaching exposition of humanism, and its "transatlantic cousin," pragmatism, by an English philosopher. The criticism in his work is directed against absolutism. The most constructive part is the essay on The making of truth in which he disclaims the notion that truth is created by us out of nothing.

150 Psychology. Mental tests

Angell, James Rowland, 1869– Introduction to psychology. 1918. 281p. illus. Holt $1.60

A good textbook for beginners in psychology which covers much the same ground as his *Psychology* but is briefer. There is noticeable an adoption of certain phases of the newer movements in psychology, such as the objective methods of study and the interest in the subconscious mind. In the main, however, the same biological point of view is maintained. The author's *Psychology* (Holt, 1908. $2.25) unites in a textbook the standard general psychology which James' *Principles* represents and the results of recent experimental studies.

Psychology

Baldwin, James Mark, 1861– Mental development in the child and the race. Ed.3, rev. 1906. 477p. Macmillan $4

This stimulating study on the methods and processes of mental development in the child and the race is treated comparatively and genetically. The important contribution is his "dynamogenic method" which consists in observing the motor reactions in-

duced by sense stimulation. The work is of equal interest to biologists and psychologists. It was first published in 1895. *Story of the mind* (Appleton, 1915. $1) brings together his views from his earlier works and essays which appeared in a wide range of periodicals. They deal with the science of the mind, introspective, experimental and comparative psychology.

Driesch, Hans Adolf Eduard, 1867– Crisis in psychology. 1925. 275p. Princeton $2.50

The author is professor of philosophy in Leipsic university. The problems discussed formed the subject matter of a number of lectures delivered by him in Peking and in various other parts of the world during 1922 and 1923. They consider the mind-body problem, the unconscious, psychical research, and the fundamental materials and laws of normal psychology. Written for those not necessarily versed in psychology.

Psychology

339 25–16680

Gates, Arthur Irving, 1890– Elementary psychology. 1925. 594p. illus. Macmillan $2.60

A very up-to-date, thorough textbook for the elementary student. The first part deals with the physical basis of behavior and conscious activity, attention centering on functions rather than structures. It is similar in type to the author's *Psychology for students of education* (Macmillan, 1923, $2.50), but contains a more extensive account of the introspective studies of conscious states and processes. Both texts are especially valuable for their concrete illustrative detail.

Gesell, Arnold Lucius, 1880– Mental growth of the pre-school child. 1925. 447p. illus. Macmillan $3.50

The principles, methods and results of a research study conducted by the Yale psycho-clinic to determine tentative standards for measuring the mental development of children from one month to six years. Also contains accounts of some comparative studies and of superior and retarded children. The measuring technique and all data are systematically presented and should be valuable to psychologists, pediatricians, and teachers.

Griffitts, Charles Hurlbut, 1889– Fundamentals of vocational psychology. 1924. 372p. illus. Macmillan $2.50

This textbook for employment managers and vocational counselors discusses ways in which individuals differ, methods of measuring differences and knowledge of their causes, as necessary background in vocational work. Many tests are included to illustrate general principles and methods. The author is assistant professor of psychology in the University of Michigan.

Psychology, Physiological

344 24–11340

Hart, Bernard, 1879– Psychology of insanity. (Cambridge manuals of science and literature) 1912. 176p. Cambridge; Macmillan $1

The author treats selected fields of insanity from a rigidly psychological point of view, and entirely avoids the discussion of the morbid physiological conditions which accompany the morbid states of consciousness with which he is concerned. An interesting part of the work is his study of mental operations of the queerness and hobbies of so-called normal people.

James, William, 1842–1910. Psychology; briefer course. 1923. 478p. illus. Holt $2.50

This is a reprint of the 1892 edition of James' *Psychology,* which is an abridgment of his *Principles of psychology* 2v. (Holt, 1890. $8). "The larger work, which is an ornament to American thought and scholarship, has proved itself a matchless treatise for classroom use in the hands of students who have had elementary courses in psychology and metaphysics." The abridgment condenses the material in the larger work, and adds new material emphasizing the psychological side for beginners. It is especially strong in the introspective work, but does not neglect objective experimentation and succeeds in giving a wonderfully graphic portrayal of the concrete facts of our mental life.

McDougall, William, 1871– Outline of psychology. 1923. 456p. illus. Scribner $3.50

A well-organized text which affords an excellent introduction to the purposive, as opposed to the mechanistic school of psychology, written for students and professional psychologists. In *Outline of abnormal psychology* (Scribner, 1926. $4) the author states that he considers it a second part of a complete work of which the above title is Part I. He hopes that their conjunction may help to bridge the gap between academic psychology and the study of the neuroses and psychoses. His aim is to deal fairly with all the various schools, giving both severe criticism and sincere appreciation to each.

The author, formerly head of the psychological laboratory at Cambridge University and now director of the National institute of industrial research, London, has here put in book form, with certain revisions, a course of lectures delivered at Columbia university. His main purpose is to describe the present position of industrial psychology in Great Britain and the main contributions made to it by eminent psychologists. He holds that each nation has its own psychology and each should be able to make its particular contribution to the science. The striking difference between the English and American motion-study is that the former seeks for ease of work from which condition speed follows, while the latter seeks for speed mainly. There are references for further reading at the ends of the chapters.

Watson, John Broadus, 1878– Behaviorism. (People's institute, New York. Extension courses) 1925. People's institute $3

Behaviorism, the new school of psychology which excludes from consideration all the subjective ele-

ments present in the other schools and admits only those elements which can be expressed in terms of stimulus and response, is discussed in this book by one of its leading exponents. There are twelve lectures included, each of which has a definite message. No conclusions are made for which there is not actual proof by experiment. *Psychology from the standpoint of a behaviorist,* second edition (Lippincott, 1924. $3) is an authoritative and interesting treatment of personality and emotional expression from the behaviorist point of view. This edition brings the work thoroughly down to date and includes a new chapter on vision and an interesting addition on glands.

153 Understanding

Columbia associates in philosophy. Introduction to reflective thinking. 1923. 351p. Houghton $2

A textbook in the technique of thinking, seeking by examples of problems solved in different branches of science to show the stages in the process of thinking and the methods by which logical conclusions are reached. There is a bibliography at the end of each chapter.

Thought and thinking

384 23–13137

Dewey, John, 1859– How we think. 1910. 224p. Heath $1.60

A study of the nature and logical process of reflective thinking as applied to the problem of training children to scientific habits of thought. The best book on the subject for both teachers and students, but the style is too compact for desultory reading.

170 Ethics

Aristoteles. Nicomachean ethics; tr. by J. E. C. Welldon. 1897. 352p. Macmillan $2.90

This is a reprint of the 1892 edition. The translation is made from Bekker's text (1881). An analysis of the ethics by books and chapters, which precedes the translation, is full, clear and skilfully made. It is regarded as the best translation of Aristotle's moral philosophy. Its value is enhanced by marginal references and footnotes.

Joad, Cyril Edwin Mitchinson, 1891– Thrasymachus; or, The future of morals. (To-day and to-morrow ser.) 1926. 88p. Dutton $1

The doctrine of Thrasymachus, a speaker in Plato's *Republic*, that morals are the invention of the powerful to insure the subservience of the weak, is analyzed here. Economic independence and birth control are making possible a new freedom for women and Mr. Joad finally concludes that herd morality and blue legislation must lead to a religious revival which alone is strong enough to change things. Stimulating and provocative.

Originally intended as a part of a larger work upon which the author was engaged at the time of his death. Except for the introductory chapters it is concerned with the origin and historical development of morality from the time of primitive man up to the 19th century. As an able presentation of the naturalistic basis of ethics and as the work of an important Russian scholar it will interest students of philosophy in spite of its incomplete state.

Palmer, George Herbert, 1842– Field of ethics. 1901. 213p. Houghton $1.75

Excellent and wholesome essays given as the William Belden Noble lectures for 1899, at Harvard. The author's object is to fix the place of ethics in a rational scheme of the universe, to determine the character of the moral man and the boundaries which separate ethics from other branches of knowledge.

Contents: Ethics and the descriptive sciences; Ethics and the law; Ethics and aesthetics; Ethics and religion, affinities; Ethics and religion, divergencies; Conclusion.

Ethics

412 1–26255

—— Nature of goodness. 1904. 247p. Houghton $1.75

A consideration of the first problem of ethics. The Contents shows discussion under the following topics: Double aspect of goodness; Misconceptions of goodness; Self-consciousness; Self-direction; Self-development; Self-sacrifice; The three stages of goodness. In both these books Professor Palmer strikingly illustrates the principle that the profoundest truths can be made clear to the non-professional student, provided the teacher sees the truth clearly himself.

Key, Ellen Karolina Sofia, 1849–1926. Century of the child; tr. by Marie Franzos. 1912. 339p. port. Putnam $1.50

This work, first published in 1900 in Swedish, has gone through more than twenty German editions, and several English reprintings. The author contends that the future of woman depends rather upon a nobler conception of her natural mission as wife and mother than upon any enlargement of her social and economic sphere. Some of the ideas are very radical, but those on education, based on sympathy with child nature and long experience as a teacher, are especially valuable.

Boethius, d. 524. Consolation of philosophy, with the English translation of "I. T." (1609) rev. by H. F. Stewart. (Loeb classical library) 1918. 420p. Putnam $2.50

The first title in this volume is *The theological tractates* which, although closely associated with his other works, is primarily dealing with theology; it marks Boethius as a forerunner of St. Thomas. *The consolation of philosophy* is "a golden volume" not unworthy of Plato or Tully, and not as some have said "a patchwork of Aristotle and the Neoplatonists." It is in the form of a dialog between the author and Philosophy in which he is shown "the mutability of all earthly fortune and the insecurity of everything save virtue." Boethius was called the Augustine of philosophy.

Bosanquet, Bernard, 1848–1923. Value and destiny of the individual. 1924. 331p. Macmillan $4.25

A continuation of the Gifford lectures for 1911 published under the title *Principle of individuality and value,* which is now out of print. The first series was a restatement with some modification of the general philosophical position of Mr. Bradley in his *Appearance and reality.* In this series for 1912, now reprinted, the problems discussed are, God, Freedom and Immortality, and the part that these play in the emancipation of man from his narrow self-centered existence. "It is perhaps the ripest fruit of the idealistic development in England; at least from the point of view of the interpretation of life."

Hendel, Charles William, jr. Studies in the philosophy of David Hume. 1925. 420p. Princeton $4

"These studies constitute an attempt at a more adequate reconstruction of Hume's intellectual development with respect to his main metaphysical problems. Professor Hendel's thesis is that the key to his reconstruction is Hume's persistent interest in religion, coupled with his early sense of the invalidity of the current efforts to justify the prevailing conception of God, as First Cause. The book is expository rather than creative."

Fichte, Johann Gottlieb, 1762–1814. Vocation of man; tr. by William Smith, with biographical introd. by E. Ritchie. 1906. 178p. Open court 75c

More perhaps than any other speculative theory Fichte's is a pure and self-consistent idealism, to many thinkers too abstract to be of service in actual experience. The present volume, however, is clear and untechnical, discussing his philosophy but not his system-building. There is much also which throws light upon the systems of Kant, Hegel, Schopenhauer and the modern pragmatists.

Ellwood, Charles Abram, 1873– Reconstruction of religion; a sociological view. 1922. 323p. Macmillan $2.25

Believing that religion is a necessary requirement of modern life he outlines under four heads the great general principles necessary if Christianity is to survive: The significance of religion for the social life of man; Social significance of Christianity in the sense of the religion of Jesus; The perception of the essential paganism and barbarity of our present civilization; That religion be based upon facts and so brought into harmony with positive science. Profound as to thought and clear as to reasoning its strong common sense will recommend it to the general reader. It has been ably supplemented by the sequel *Christianity and social science, a challenge to the church* (Macmillan, 1923. $1.75)

Jacks, Lawrence Pearsall, 1860– Living universe; three lectures. (Hibbert lectures, 1923) 1924. 111p. Doran $1

The thought underlying them is that the universe is a living, not a dead, lifeless mechanism, and that we are fellow workers in its creative evolution. The three lines developed are that religion and education are a unity; that the ideal of civilization is that it shall develop the spirit of man rather than the material world; and in the last lecture expression is given to his conception of immortality in a living universe.

—— Science and Hebrew tradition. (Collected essays) 1920. Appleton $2.50

John Fiske has said: "If absolute loyalty to truth, involving complete self-abnegation in the face of the evidence, be the ideal aim of the scientific inquirer, there have been few men in whom that ideal has been so perfectly realized as in Huxley." It is in this spirit that he has questioned and argued against traditional theology and sought to lead the dissatisfied to what he was convinced was the higher, better and sounder truths dealt with in these two volumes.

Moulton, Richard Green, 1849–1924. How to read the Bible; incorporating the Bible at a single view. 1923. 133p. Macmillan 80c

The final volume in the small twenty-five volume edition of the *Modern reader's Bible* sold separately at 80c.

Dr. Moulton considers that the Bible takes literary shape as a drama in two acts, the Old and New Testaments, with the books of Wisdom as an interlude (Proverbs, Ecclesiastes, Job in the Bible itself, Ecclesiasticus and the Wisdom of Solomon in the Apocrypha). It has "for its stage the whole universe, for its period all time; God is the hero of this drama, and its plot Divine Providence."

Noyes, Carleton Eldredge, 1872– Genius of Israel; a reading of Hebrew Scriptures prior to the exile. 1924. 451p. Houghton $5

"An interpretation rather than a history, this book aims to portray the Israelites as they were in the flesh, at work and at play, in the actual circumstances of their everyday experience, and in their relations with contemporary nations. The genius of Israel was supremely a genius for religion." The Old Testament, as a composite of many different books, is not easy to understand if read consecutively. The author has therefore tried to weave together the various threads from these scattered and fragmentary writings and interpret the people and civilization of which they are a record.

Driver, Samuel Rolles, 1846–1914. Introduction to the literature of the Old Testament. (International theological library) Ed.10. 1918. 577p. Scribner $3.50

The author emphasizes the fact that it is merely an introduction and as such includes "an account of the contents and structure of the several books together with such an indication of their general character and aim" as could be achieved in the brief space allotted. It is, however a very careful, detailed, technical study for the use of the theological student or scholar. Its viewpoint is fair and its authority final. 225 New Testament: Texts. Introductions. History. Criticism

Bible. N. T. New Testament; an American translation, by E. J. Goodspeed. 1923. 481p. Univ. of Chic. $3

A scholarly translation from the original Greek into the "simple straightforward English of everyday expression" based upon the mass of authentic Greek papyri recently discovered. It is not intended to supplant the King James version but to make reading the New Testament both easy and intelligible to modern readers. Footnotes, historical introductions and paragraphs for verse divisions have been omitted. A work similar in purpose but not so direct in style and retaining more of the conventionality of the authorized version is the *Riverside New Testament* translated by W. G. Bible. N. T. New Testament; a new translation by James Moffatt. New ed. rev. 1922. 395p. Doran $1.50

Using the Von Soden text the translator has attempted to render the New Testament "exactly as one would render any piece of contemporary Hellenistic prose," and in so doing has produced a vigorous, direct, uncompromisingly modern text in the class of which Doctor Weymouth's and the Twentieth century New Testament have been the best known examples. Though some will miss the dignity and beauty of the old translation, many will get from it new light especially on the Epistles.

Contents: Christ the son of God, 2v. (12-35569); Saint Peter and the first years of Christianity (12–35571); Saint Paul and his mission (4–4640); Last years of Saint Paul (1–29307) Saint John and the close of the Apostolic age (5–30561).

Not written with any idea of taking active part in controversial matters, their purpose is to answer the critics and iconoclasts by giving "a faithful picture of early Christianity satisfying to the Christian heart." The volumes on the life of Christ are a non-controversial answer to Renan's work and form the standard life for Catholic readers. Possibly the most highly esteemed are the two volumes on St. Paul. The St. Peter is marked with brilliancy of style and is the crowning work in Petrine literature. The last, St. John, was published posthumously and does seek to establish the authenticity of the Apostolic documents. Breadth of view, accuracy of learning and sincere piety mark all of the author's writings.

Matthews, Walter Robert, 1881– Gospel and the modern mind. 1925. 188p. Doran $1.75

A clear and candid setting down of the thoughts of one mind in an endeavor to help other minds gravely perplexed about the problems of religion, in the hope that "the chapters may be of some little service in commending the eternal truths of religion to the mind of the present age." The material of the volume is adapted from sermons delivered at St. Bartholomew's (New York City) during the summer of 1924, by the author, who is dean of King's college, London.

Moore, Edward Caldwell, 1857– Outline of the history of Christian thought since Kant. (Studies in theology) 1912. 249p. Scribner $1.75

A scholarly, well proportioned little manual. The subject matter is grouped by chapters principally in three sections: the destruction of the scholastic theology and the development of idealism from Kant to Ritschl; the critical and historical movement from Strauss to Harnack; and the effects of modern science as represented by Darwin, Spencer and Huxley. A final chapter sketches briefly the work of men who have started movements, progressive or reactionary, in England and America from Coleridge to William James.

Newman, John Henry, cardinal, 1801–1890. Essay on the development of Christian doctrine. 1920. Longmans $2

An investigation into the philosophical justification of all belief in dogmatic Christianity as a living creed which proves its objective reality by its vitality. It might be said that Newman "was thinking himself into the Roman Catholic Church" when he wrote this book; he did join that body before the volume finally appeared. His literary powers make this as well as all his other books belong to the "literature of the world."

Catholic church

Peabody, Francis Greenwood, 1847– Church of the spirit; a brief survey of the spiritual tradition in Christianity. 1925. 208p. Macmillan $2

The contrast between organized Christianity and the church of the spirit is here developed by an author of unusually deep spiritual insight.

Christianity

659 25–9324

Smith, Gerald Birney, 1868– Social idealism and the changing theology. 1913. 251p. Macmillan $1.75

An admirable example of the historical method in systematic theology. It points out the causes of the gradual separation of theology and ethics since the time of Christ and the changes which have brought about a new type of moral loyalty which has made imperative a radical modification of the authority ideal. The volume is the substance of a series of lectures delivered at the Yale divinity school.

Clarke, William Newton, 1841–1912. Christian doctrine of God. (International theological library) 1909. 477p. Scribner $3.50

An instructive book, full of clear thought and independent insight. The exposition deals with the character, personality, goodness, love, wisdom and holiness of God; His relations to men as creator, father, sovereign and saviour; His relations with the universe through attributes eternal, infinite, omniscient. The author eschews metaphysical and philosophical questions giving us instead a persuasive exposition of the God idea as held by the Christian church.

Bosworth, Edward Increase, 1861– Life and teaching of Jesus according to the first three Gospels. 1924. 424p. Macmillan $2.50

Written primarily as a textbook for college students it will prove of value also to all those interested in the actual Christ, because it is presented in terms of the author's own experience, which basis he believes forms the kind of authority recognized by modern men.

Jesus Christ—Biog.

666 24–8663

Bowie, Walter Russell, 1882– The inescapable Christ. 1925. 206p. Scribner $1.50

The author, rector of Grace church, New York City, makes no pretence to set forth a compendium of theology or to represent an unassailable truth; he wishes simply to give expression to certain "great luminous suggestions" which seem real to him and which will make clear his belief that the only force great enough to give us new assurance for the world and a new heart in the people is the spirit of Jesus Christ.

Burton, Ernest De Witt, 1856–1925. Source book for the study of the teaching of Jesus in its historical relationships. (Publications in religious education) Ed.2. 1924. 277p. Univ. of Chic. $2

A presentation, in convenient form, of the material concerning Jesus' own teaching and that of his contemporaries so that the student having this at hand will be able to concentrate his attention upon interpretations and organization. The introduction carefully epitomizes the method upon which all historical study of the Bible is based and relates it to the subject under discussion. The author was head of the Department of New Testament literature and interpretation, University of Chicago.

Dawson, William James, 1854– The man Christ Jesus. New ed. 1925. 452p. illus. Century $3

This new edition is revised only in the way of minor correctives. The author has preferred the original form because he is convinced that twenty years have altered nothing that is fundamental in the general attitude of men toward Christ, or in the nature of the problems which his life presents. The book was the result of twenty-one years of close connection with the lives of young men either in congregations and other audiences or through world-wide correspondence with sincere young souls in search of a real religion. The early edition was published under the title, *The life of Christ.*

Iiró Ferrer, Gabriel, 1879– Figures of the passion of Our Lord; tr. by C. J. Hogarth. 1925. 309p. Knopf $3.50

The betrayal, trial and crucifixion of Jesus according to the New Testament are here told with such imagination, beauty, vigor and passion as is seldom encountered. Mr. Hogarth's translation from the Spanish original text of 1917 is vivid and musical. With much ingenuity the lives of Judas, Caiaphas, Barabbas, Herod, Pilate, Mary, Cleophas, and others are presented as they touched the life of Christ and converged at the crucifixion. "A book so coloured with beauty and loaded with horror as this one could only be the fruit of a Latin mind."

239 Evidences of Christianity

Arnold, Matthew, 1822–1888. Literature and dogma; an essay towards a better apprehension of the Bible. 1924. Macmillan $2

Here, then, is the problem: to find for the Bible a basis in something which can be verified instead of in something which has to be assumed. In *God and the Bible; a review of objections to "Literature and dogma"* (1920. $2) the author addresses men of free and active minds, who though they may be profoundly dissatisfied with the received theology, are yet interested in religion and more or less acquainted with the Bible.

Balfour, Arthur James Balfour, 1st earl of, 1848– Foundations of belief; being notes introductory to the study of theology. Ed.8, rev. 1902. 391p. Longmans $2.50

"A lofty, disinterested and forcible attempt to contribute something to the solution of the eternal riddle, to discover and support the truth in matters most vital to the happiness of man as a thinking being, to his beliefs, and, therefore, to his action and his endurance."

Belief and doubt

682 4–10393

Brown, Charles Reynolds, 1862– Why I believe in religion. 1924. 175p. Macmillan $1.50

A "statement of some of the main principles which underlie our common religious faith" in which the author discusses clearly and forcefully the "six broad planks in the platform of religion": The belief in God; The person of Christ; The power of atonement; The value of prayer; The use of the Bible; and The hope of future life. It is not for theologians or philosophers, but is "written in a very plain hand and for everyday people."

Harnack, Adolf, 1851– What is Christianity? tr. by T. B. Saunders. (Crown theological library) Ed.3, rev. 1904. 306p. Putnam $2

A series of lectures delivered extempore to a class of some six hundred students drawn from all the Faculties of the University of Berlin. The purpose was to give a short and plain statement of the Gospel and its history free from the recondite language of learning which buries it in scholarly folios. The work both in German and in translation made a stormy appeal to lay and student readers and it remains both an authoritative and a popular source of discussion.

Mathews, Shailer, 1863– Faith of modernism. 1924. 182p. Macmillan $1.50

What the modernist within the church believes and why he believes it is presented clearly and forcefully. Modernists are defined as "Christians who accept the results of scientific research as data with which to think religiously." This volume with Dr. Fosdick's *The modern use of the Bible,* may help solve some of the complex problems which have arisen from a dogmatic interpretation of Christian faith.

Modernism

685 24–25304

Parks, Leighton, 1852– What is modernism? 1924. 154p. Scribner $1

In response to the many expressions of doubt and anxiety which he received after the statement of his position in regard to the Fundamentalist-Modernist controversy, the rector of St. Bartholomew's Church, New York, has written this clear, non-technical exposition of the meaning and spirit of modernism and its principal tenets.

240 Devotional. Practical

Browne, Sir Thomas, 1605–1682. The religio medici and other writings. (Everyman's library) 1906. 296p. Dent; Dutton 80c

The Religio Medici has been pronounced "A confession of intelligent orthodoxy and logical supernaturalism couched in some of the most exquisite English ever written." Not designed for publication it nevertheless went through thirty-three editions between 1642 and 1881; ten Latin translations between 1644 and 1743; as well as several Dutch, French and German translations. The other writings in this volume were based on careful study, observation and travel records, but are more in the nature of a delightful indulgence on the part of the author than scientific treatises for the world. Also published in Golden Treasury Series, Macmillan $1.40, and in an edition edited by Murison 1920, $1.50.

Keble, John, 1792–1866. Christian year; introd. by J. C. Shairp. (Everyman's library) 254p. Dent; Dutton 80c

Published anonymously in 1827, it had gone through 109 editions of three and five thousand copies by 1867 and has not yet ended its popularity. The universal appeal is due to Keble's understanding that poetry is the special enjoyment of the religious mind and through it he knew how to touch the springs of moral and religious feeling which lie deep in all hearts, and moreover was able to connect his art with everything in nature and life.

Atkins, Gaius Glenn, 1868– Craftsmen of the soul, and other addresses. 1925. 203p. Revell $1.50

A selection from the author's sermons of the last few years which seem to develop one central theme, "the upbuilding of a man" which Emerson calls "the main enterprise of the world for splendour, for extent." They treat in a direct, thoughtful manner "the conduct of life and our creative shaping of our own souls" viewed from many sides but seeking a real unity of advance.

Channing, William Ellery, 1780–1842. Discourses and essays. Beacon pr. $1.25

The sermons of this most eminent representative of the Unitarian movement in this country "were coherent and complete as compositions but given with a warmth and intensity of expression with which scholarship and delicacy of thought are seldom united." A keen practical sense of the duties of life was more conspicuous in his writings than abstract speculative power.

Wilson, Warren Hugh, 1867– Evolution of the country community. Ed.2, rev. 1923. 258p. Pilgrim $2.25

A careful study of the successive types of rural community that have prevailed in the United States and of the social and religious conditions that have been peculiar to each. It shows how the growing social coherence of the communities has made necessary a broader social policy on the part of the country church, and maintains that it is only through the service of the church as an organizer and unifier of community life and an upholder of ideals, aided by an improved country school, that rural social problems can be solved. Franklin H. Giddings contributes an introduction. *The farmer's church* (Century, 1925. $2) aims to give the rural preacher a broader conception of the place of the church in rural life.

Locke, John, 1632–1704. Four letters on toleration. (World library of standard books) 1876? Ward o.p.

Said to be the most original of all Locke's works it was written while he was in Holland seeking refuge from intolerance. He made a strong plea for "absolute liberty, just and true liberty, equal and impartial liberty"; and he believed in the universal toleration of all modes of worship, not immoral in their nature, or involving doctrines inimical to good government.

Van Loon, Hendrik Willem, 1882– Tolerance. 1925. 399p. Boni & Liveright $3

In this story of the bigotry and cruelties of the past Mr. Van Loon shows how the self-constituted guardians of public morals have ever been foes to freedom of thought and speech. He shows that tolerance is born of doubt, never of faith, and that the conviction of possession of absolute truth is the most pernicious error in human history. When men began to doubt the existence of a compensating life after death, they resolved to make this life more tolerable to poor humanity. The first half of the book traces the development of intolerance among Christians. The other half is concerned with such leaders against intolerance as Erasmus, Rabelais, Montaigne, Spinoza, Voltaire and Tom Paine.

280 Christian churches and sects

American church history series. 1893–1915. 13v. Scribner $3 each; v.4-9, o.p.

An extremely valuable series giving historical material found nowhere else, which, while authentic and scholarly, is of interest to readers merely seeking general information on the subject. In the *A. L. A. Catalog 1904* the volumes were classified according to denomination written about, but it has been thought more expedient to group them under the series here. The titles are as follows: v. 1, The religious forces of the United States, by H. K. Carroll (4–4646) v. 2, Baptists, by A. H. Newman (15–15502) v. 3, Congregationalists, by Williston Walker (4–4663) v. 4, Lutherans, by H. E. Jacobs (4–4653) v. 5, Methodists, by J. M. Buckley (4–4645) v. 6, Presbyterians, by R. E. Thompson (4–4660) v. 7, Protestant Episcopal, by C. C. Tiffany (4–4661) v. 8. Dutch Reformed Church, by E. T. Corwin (4–4647) Reformed Church, German, by J. H. Dubbs (4–4648) Moravian, by J. T. Hamilton (4–4651) v. 9, Roman Catholics, by Thomas O'Gorman (4–4656) v. 10, Unitarians, by J. H. Allen (4–4642) Universalists, by Richard Eddy (4–4649) v. 11, Methodist Episcopal Church, South, by Gross Alexander (4–4641) Presbyterians, South, by T. C. Johnson (4–4654) United Presbyterians, by J. B. Scouller (4–4657) Cumberland Presbyterians, by R. V. Foster (4–4650) v. 12, Disciples of Christ, by B. B. Tyler (4–4662) Society of Friends, by A. C. and R. H. Thomas (4–4659) United Brethren, by Daniel Berger (4–4644) Evangelical Association, by S. P. Spreng (4–4658) Bibliography, by S. M. Jackson (4–4652) v. 13, History of American Christianity, by L. W. Bacon (4–4643)

Bliss, Frederick Jones, 1859– Religions of modern Syria and Palestine. (Bross library) 1912. 345p. Scribner $2.50

Expanded from the Bross lectures delivered at Lake Forest college in 1908, this authoritative study embraces an elaborate collection of material derived from careful research and personal observation. The author considers the expressions and influence of the religions of the Christian, Mohammedan, Greek and other churches, estimating impartially the work done by missions, the value of which consists more in educational and moral uplift than in the number of conversions made.

Sacred books of the East. 50v. Oxford, prices vary

This series includes all the most important works of the seven nonchristian religions that have exercised a profound influence on the civilization of the continent of Asia. Twenty-one volumes are given to the Vedic-Brahmanic system, two to Jainism, eight to the translation of sacred books of the Persians, two to Mohammedanism and six to Confucianism and Taoism. The work was carried on by the collaboration of twenty scholars all leading authorities in their special fields with the result that the historical and comparative study of religions was for the first time placed upon a solid foundation. The Index volume presents the material thoroughly digested and exhaustively classified so that it really becomes a handbook for the study of Oriental religions. Apart from the interest to theologians and missionaries the series now assumes a new importance in the character of ancient historical documents because the traditional religious records form the oldest historical records and mark the beginning of documentary as opposed to purely traditional history. The translations are accurate, complete and unembellished versions.

291 Comparative and general mythology

Bulfinch, Thomas, 1796–1867. Mythology. Rev. and enl. ed. 1913. 912p. illus. map. Crowell $3

This edition includes: The age of fable; The age of chivalry; Legends of Charlemagne. All of these works on mythology as well as his others, originated in the author's desire to popularize that subject and "extend the enjoyment of elegant literature." It is because of this last purpose that the books are invaluable as accompanying the great works of literature which cannot be enjoyed without a knowledge of mythology. *The Age of fable* may be obtained separately (McKay, 1898. $2)

Frazer, Sir James George, 1854– Folk-lore in the Old Testament. Abridged ed. 1923. 476p. Macmillan $5

Formerly published in three large volumes, this work is now made accessible in price to the general public. It attempts, "on the lines of folklore, to trace some of the beliefs and institutions of ancient Israel backward to earlier and cruder stages of thought and practice which have their analogies in the faiths and customs of existing savages." It is an important book in the field of comparative religion.

—— Golden bough. Abridged ed. 1922. 752p. Macmillan $5

This study of magic and religion is a perfect thesaurus of information bearing upon savage beliefs, practices, and all forms of primitive religion. There were two editions before the complete third, revised and enlarged, appeared in twelve volumes (1907-1915) The twelfth volume contains a bibliography and index which makes the whole valuable for reference. The abridged edition here entered has retained the basic ideas of the original with as much evidence as was needed to illustrate them and as little change in the text as possible has been made; but notes and bibliography have been omitted.

—— Worship of nature. 1926– v.1. Macmillan $4

This volume contains the whole of the Gifford lectures delivered before the University of Edinburgh in the years 1924 and 1925 together with much added material which could not be considered in twenty lectures. Nothing more delightful can be imagined than to have listened to the lectures if they held one fascinated as does the reading of this text replete with informative narratives of primitive rituals told with deep intimate interest and written in clear, gracious, imaginative style. After the general introductory chapter on the origin and need of religion, five chapters are concerned with the worship of the sky among ancient and backward peoples, six with the worship of earth and five with that of the sun, which last the author purposes to complete in a sequel to this volume which will also deal with the worship of other aspects of nature, both inanimate and animate.

Mythology of all races; ed. by L. H. Gray and G. F. Moore. 1916– 13v. illus. Jones $8 each

Published under the auspices of the Archaeological institute of America, the scholarliness and reliability of this collection is assured but the material is presented in a form attractive to the man of general education and to young people. The titles of the various volumes of the complete set run as follows:

v.1, Greek and Roman; v.2, Eddic; v.3, Celtic, Slavic; v.4, Finno-Ugric, Siberian; v.5, Semitic; v.6, Indian, Iranian; v.7, Armenian, African; v.8, Chinese, Japanese; v.9, Oceanic; v.10, North American; v.11, American (Latin); v.12, Egypt, Far East; v.13, Index.

There are no separate indexes for the different volumes but the tables of contents are full and adequate. The illustrations are excellent, and the bibliographies comprehensive. Much of the material is given in English for the first time; the editor feeling that "a comprehensive collection . . . lends itself also to comparative study of simple myths or systems of myths among different and widely remote peoples." The writers are authorities, they have been given full latitude; the text of the books is clearly written, much fuller than the ordinary handbook and without sacrifice of the qualities that insure the respect of scholars. Volumes 2, 4, 5, 8 and 13 are still to be published; volume 4 will appear very soon and volume 8 is nearly ready for printing.

There have been very few and only minor changes in the various editions since the first of 1893. The work of this eminent German classical scholar is held in high repute and in spite of the copious notes for research use, grouped at the end of the chapters, the text is delightful reading for anyone interested in the subject. It "offers an account of the opinions held by the Greeks about the life of the human soul after death and is thus intended as a contribution to the history of Greek religion."

Saunders, Kenneth James. Epochs in Buddhist history. 1924. 243p. illus. Univ. of Chic. $3

"The author is a Christian with eye and heart open to see and praise all that appears admirable in the religion of the Buddha." These Haskell lectures for 1921 form a history of Buddhism in India, Ceylon, Burma, Siam, China, Korea, Japan, Nepal and Tibet, and endeavour to show how the stream of Buddhism which had its source in the complex system of Brahmanism spread out over the eastern world. The author has also published a small non-technical work, *The story of Buddhism* (Oxford, 1916. 85c)

Stevenson, Margaret. Heart of Jainism; introd. by G. P. Taylor. (Religious quest of India) 1915. 336p. Oxford $3

Jainism "represents a theological mean between Brahmanism and Buddhism" so that a serious study of it is necessary to an understanding of the ritual of either. Therefore, although it is now one of the minor religions of India judged by the number of adherents, a study of it is justified. The book is invaluable in the work of the Christian missionary and also to the student of the religions of India.

Upanishads. Thirteen principal Upanishads; tr. with an outline of the philosophy of the Upanishads, by R. E. Hume. 1921. 539p. Oxford $5

The aim of the author has been to meet the needs of varying types of readers by giving a faithful rendering of the original text,—an English version that will enable them to know exactly what the revered Upanishads say. These metaphysical treatises are replete with sublime conceptions and with intuitions of universal truth. A selected, classified and annotated bibliography of the Upanishads is included; also a Sanskrit and a general index.

Vedas. Rigveda. Hymns, selected and metrically tr. by A. A. Macdonell. (Heritage of India ser.) 1923. 98p. Oxford $1.10

A selection of forty hymns from the Rigveda translated in verse corresponding as nearly as is possible in English to the original metres. The selection has been confined to the oldest and most important of the four Vedas, the Rigveda. An introduction supplies a brief sketch of the form and content of the Rigveda. The author's *Vedic reader* (Oxford, 1917. $2.85) supplies the exact prose rendering. Another well edited translation is *Vedic hymns,* translated from the Rigveda with introduction and notes by Edward J. Thomas, (Dutton, 1923. $1.50). It is one of the Wisdom of the East series.

297 Mohammedanism

Arnold, Thomas Walker, 1864– Preaching of Islam; a history of the propagation of the Muslim faith. Ed.2. 1913. 467p. Constable 12s6d

A history of the spread of Mohammedanism written with some bias but on the whole well done. It is a thorough revision of a work published in 1897 (New Amsterdam press) which has been out of print for a number of years. *The Caliphate* (Oxford, 1924. $3.50) is perhaps the first comprehensive study; it surveys the development from the beginning to the present day. The author is the famous professor of Arabic and Oriental studies in the University of London.

301 Philosophy. Theories

Allport, Floyd Henry, 1890– Social psychology. 1924. 453p. illus. Houghton $2.50

A text intended for courses in social psychology and the various social sciences which consider psychological foundations. It is also of great interest to all those seeking informative guidance in the study of social problems. Emphasis is given to the thesis developed throughout that the behavior mechanisms of the individual are fundamental to all interaction in the group, crowd and society. There are valuable reference lists at the end of all chapters.

Bushee, Frederick Alexander, 1872– Principles of sociology. 1923. 577p. Holt $3.50

Meant primarily as a textbook, one educator pronounces it the best now available for college use. It is more an organization of material which the author has used during years of classroom experience than a presentation of new data. The physical and biological bases of society predominate rather than the psychological. The fluent style and accurate expression make it readable and understandable for the thinking general reader.

Beach, Walter Greenwood, 1868– Introduction to sociology and social problems; ed by W. F. Ogburn. 1925. 369p. Houghton $2.25

A comprehensive introductory study presenting clearly and concretely the elements of sociological theory. Recommended by Howard W. Odum in the A. L. A. reading course—*Sociology and social problems* which says: "Pervading the whole is a fine spirit, singularly free from prejudice, that must certainly lead the reader to a strong constructive

interest in human betterment." Primarily intended for introductory college classes in sociology.

—— Sociology and modern social problems. Rev. ed. 1924. 416p. Amer. bk. $1.48

Originally written as an elementary text for use in high schools, colleges and reading circles it is so organized that it affords opportunity to combine the study of sociology with that of current social problems and to correlate it with a course in economics. It has been twice revised to meet changing conditions since 1918. The family unit is used as the basis of observation for the elementary student from which his scientific study of society is to develop. Select references are given at the end of each chapter.

Park, Robert Ezra, 1864– and **Burgess, E. W.** Introduction to the science of sociology. Ed.2. 1924. 1040p. Univ. of Chic. $4.50

A text designed to furnish the student a method of study that will enable him to "get facts, rather than formulate opinions." It is made up of numerous excerpts from the works of well-known sociologists arranged with context to show the "range, divergence, the distinctive character of the writings, and points of view upon a single topic." The first half of the chapters raises questions on the topics discussed, the last half outlines problems for further study, thus enabling the student to form his own conclusions. Chapter bibliographies selected especially with reference to points raised. Indexes of authors and subjects.

American year book, 1910 to 1919, 1925 to date. Macmillan $7.50 (1925)

A resuming of the publication of a valuable reference tool which was issued during the years 1910 to 1919 by Appleton. The responsible organization planning the new volume through a board of directors is made up of forty-five national societies working through representatives of specialized authority in the various subjects considered. It is not merely an almanac of concentrated information but also a conspectus of the nation's progress in literature, art, science and education, as well as a descriptive record of political and governmental events. The book is considerably larger than in previous years because of the addition of new sections demanded by changing conditions. Appleton reports the issues of 1910 to 1919 out of print.

Kropotkin, Petr Alexsieevich, kniaz', 1842–1921. Mutual aid; a factor of evolution. 1904. 348p. Heinemann 3s6d

Through keen personal observation in his youth Kropotkin's mind was started on the development of his thesis that, Darwin to the contrary notwithstanding, mutual aid in all forms of life including that of man is a far larger and more important factor in progressive evolution than the destructive struggle for existence. The biological phase is merely basic for sociologic interpretation. In this present era it is a particularly timely argument to consider.

Joad, Cyril Edwin Mitchinson. Introduction to modern political theory. (World's manuals) 1924. 127p. ports. Oxford $1

This brief summary of the important aspects of modern political thought is devoted mainly to an exposition of socialism, although it gives a preliminary discussion of the idealist theory of the state and modern individualism and has a chapter on communism and anarchism. One of an inexpensive series of introductory studies which aims to present brief, impartial, nontechnical summaries of knowledge in various fields. Bibliography and index.

—— Foundations of sovereignty and other essays. 1921. 317p. Harcourt $3.50

"A common thesis unites them all: the unified and sovereign state is morally inadequate and administratively inefficient, and for this political monster we must substitute a pluralistic state which offers coordination for hierarchical structure. A common purpose runs through the most technical pages. It is a desire to help fix the new social philosophy on firmer historical foundations." The book is replete with references, ancient and modern, which assure the author's grasp of his subject.

Aristoteles. Politics and economics; tr. by Edward Walford, introd. by John Gillies. 1902. Bell o.p.

Originally published in 1853 it has been considered by scholars an important publication because of the valuable introduction, life, analysis and notes by authorities. It is noted here because of the much discussed two books called *Economics,* which in relation to Aristotle's whole system of moral philosophy stand midway between his *Ethics* and *Politics.*

"The main theme of these lectures is the growth of jural consciousness among all civilized nations, and its embodiment in the Modern State;—a phenomenon which is believed to have an important bearing upon international life and intercourse." The material is of particular value to the student of international politics because of its relation to the present policy of international arbitration now being so freely discussed and practically applied. The authority of the volume lies in its being the carefully prepared expression of the thought of a

tatesman of broad experience and an historian of erious, well considered purpose.

Palgrave, Sir Robert Harry Inglis, 1827–1919, ed. Dictionary of political economy; ed. by Henry Higgs. New ed. 1923–26. 3v. Macmillan $10 each

A standard English work first issued in 1894. The type of this new edition has not been reset although "considerable modifications" in the original plates have been made. Additional articles and continuations of original articles have been included in an appendix and the index has been expanded to include that material. The same treatment was given to v.2, F-M issued 1923; also to v.3, N-Z issued 1926.

The subject matter is made up of brief articles on philosophy, history and contemporary conditions. Biographic sketches, definition of terms, and bibliographic notes are some of the phases of its diversified inclusiveness. The articles are signed by the initials of well-known economists representing various schools and interests.

Merriam, Charles Edward, 1874– and **Gosnell, H. F.** Non-voting. (University of Chicago studies in social science) 1924. 287p. Univ. of Chic. $2.50

An analysis of the causes of non-voting, based on a survey of the non-voters in a recent mayoralty election in Chicago. The methods of the survey are described and the results graphed and carefully analyzed. Important as the most comprehensive study of its kind, it discloses many interesting and valuable facts of a specific and reliable character. The work was done largely by graduate students in the University of Chicago.

Because of the crowding events of the last two years (1922-23) demonstrating more forcibly than ever the complex interdependence of international happenings, this book has attempted to pierce the welter of detail and to trace the outline of the international developments of that period as they affect the working-class movement. Main issues in international affairs occupy the greater part of the volume; but a long chapter is given to developments in the labor movement in a number of countries, selected on account of their intrinsic importance or for the significance of the events transpiring. There is appended a directory of International labour organizations. The first complete survey was made in the *Labour international handbook* (1921. 12s6d) It was compiled along the same lines but is necessarily of much broader scope. Provided with a complete index, a full diary of 1914 to 1921, and with every chapter divided into specific sections it forms an invaluable reference book on international affairs.

Labor problems

1104 [23–18149]

Labour year book, 1916 to date; issued under the auspices of the Trades union congress and the Executive committee of the Labour party. Labour pub. 5s (1925)

Through its three previous editions, 1916, 1919 and 1924 this concise handbook has established itself "not merely as the foremost existing work of reference on industrial, economic and political affairs, but as one which is absolutely indispensable to all those concerned with safeguarding the interests of the workers." This edition is particularly valuable as reviewing the period during which the first Labour government was in power. There are fourteen directories of all kinds of labor organizations and institutions; and many valuable statistical tables.

Lauck, William Jett, 1879– and **Watts, C. S.** Industrial code. 1922. 571p. Funk $4

The necessity for established rules "wherein there shall be defined and promulgated the fundamental principles which shall govern the relations of capital and labor," is urged. The latter part of the book consists of twenty-four appendixes, including the rules governing the War labor board, the Kansas industrial act and other statements and opinions by authorities on the labor question.

Marx, Karl, 1818–1883. Capital; a critique of political economy; ed. by Frederick Engels. 1906-19. 3v. Kerr $2.50 each

This historic work was originally written to make plain the fallacy of the whole mechanism of capitalist economy and is still held to be the source from which anti-capitalistic movements draw their constructive power. In consecutive development it deals with the processes of producing capital, the movements of capital as a whole and the history of the theories concerning capital, in this last phase being prophetic as well. A very complete index con-

taining about 1400 topics makes a reference work of this edition, and it also constitutes an excellent economic dictionary.

A contribution to The critique of political economy (1913, $1.25) is said to be the earliest analysis of capitalist society by Marx, except the *Communist manifesto*. It serves as an introduction to his *Capital*. An appendix contains Marx's classic statement of historical materialism.

A compilation which does not now include such subjects as workmen's compensation which have been dealt with at so great length that the laws must necessarily receive separate bulletin treatment; but does contain a vast number of laws summarized and condensed. Part 1, gives digests and summaries of certain classes of laws affecting labor; for example those concerning apprentices, vocational education, and mothers' pensions. Part 2, gives the text and abridgement of laws, a representative law being given in each case in full. This volume is the sixth periodic compilation of the revised laws; but the bureau supplements it with annual bulletins containing the labor legislation of the year and the decisions and opinions of the courts.

Webb, Sidney, 1859– and **Webb, B. P.** Decay of capitalist civilization. 1923. 242p. Allen; Harcourt $1.75

These two well-known leaders of the Fabian society state the case against capitalism, which they believe, though initially successful, must now be recognized as in the process of decay. Their thesis is that the capitalistic system, being directly responsible for poverty, for the resultant disparity in class freedom and above all, for war, is inherently destructive and cannot continue to exist. Simple language and a relatively uncontroversial spirit recommend the book to many readers.

Douglas, Paul Howard, 1892– Wages and the family. 1925. 290p. Univ. of Chic. $3

The author, who is connected with the University of Chicago, states that industrial workers should be paid a basic wage with an allowance for dependents, and that the "family of five" scale of payment is too great a drain on industry. The way out, he claims, lies in the fixation of a minimum wage sufficient to support single men with added allowances for dependent wives, children and other adults. A cooperative program of research was arranged whereby the International labour office afforded great assistance to the author in his investigations. A pamphlet which attracted wide attention and is used as a basis in the discussion of wage and salary adjustments is *Minimum quantity budget necessary to maintain a worker's family of five at a level of health and decency* issued by the Bureau of labor statistics (Supt. of docs., 1920, 5c)

331.3 Labor of children

Fuller, Raymond Garfield, 1886– Child labor and the Constitution; introd. by J. H. Finley. 1923. 323p. maps. Crowell $2.50

The author believes that the time has come when the problem of child labor should be restated in terms of constructive rather than restrictive and preventive measures. This is a careful scientific survey of the whole field, considering especially the nature and scope of the legislation now in effect and the outlook for federal action, an aspect of the problem recently reopened by the decision of the Supreme court declaring unconstitutional the Federal child-labor tax law.

The publications of the National child labor committee, the U. S. Children's bureau, and the special state bureaus are extremely valuable where any serious study is being done.

336.2 Taxation

ligman, Edwin Robert Anderson, 1861– Essays in taxation. Ed.10, rev. 1925. 806p. Macmillan $4

The story of the changes in the various editions of this standard work on taxation would form an outline history of the development of the subject. First published in 1895 there were slight revisions from year to year until the eighth edition (1913) which became in fact a new work of almost double the size of the first. The ninth edition (1921) was brought to date and five new chapters were added. In this last and tenth edition the changes are of significance in that the discussion of the literature throughout has been brought down to date and the chapters on double taxation, the inheritance tax and the taxation of corporations have been revised to conform with the most recent developments. Therefore we still have a standard work by a leading authority giving historic as well as recent material in a form valuable alike to the student and scholar, to the lawyer, specialist, business man and the seeker after reliable information.

National industrial conference board. Cost of living in the United States, 1914-1926. 1926. 233p. Author $2.50

The continued interest in measuring the cost of living has occasioned the Board to make several successive investigations and to publish many reports and studies concerning the subject. This volume is a thorough revision of that published in 1925 which was in such demand that the stock is exhausted. Because of the absolute necessity for knowledge of the basis and general nature of the calculations involved, especial care has been taken with the subjects of measuring the cost of living, and comparison of the index numbers of the Board, the Bureau of labor statistics and the Massachu-

setts Commission on the necessaries of life. There are continuous explanatory and reference footnotes and innumerable charts and tables.

The National industrial conference board constituted of persons designated by and from national and state industrial associations was organized May, 1916, to provide a Bureau of scientific research, a Clearing house of information, a Forum for discussion and means whereby cooperative action may be taken on matters that vitally affect the industrial development of the country and all engaged in industry. "In the preparation of its studies the National Industrial Conference Board avails itself of the experience and judgment of the business executives who compose its membership, and of recognized authorities in special fields, in addition to the scientific knowledge and equipment of its Research Staff. The publications of the Board thus finally represent the result of scientific investigation and broad business experience, and the conclusions expressed therein are those of the Conference Board as a body." Among the great number of these publications may be mentioned:

The result of an official journey to America made by this renowned French statesman and political philosopher. Originally published in 1835 its theme was first to compare the revolution which had been going on for centuries in Europe with the rapid development in America, arriving at what he then thought was almost perfection in the absolute equality of conditions established. His prediction was that the same condition would come about in Europe. "One of the few treatises on the philosophy of politics which has risen to the rank of a classic."

The author in his prefatory note says "These lectures are not intended as a systematic discussion of the character and operation of the government of the United States. They are intended merely to present it in some of its more salient features from a fresh analysis of the character and operation of constitutional government. It is hoped that they will be thought, for this reason, to be serviceable in the clarification of our views as to policy and practice."

Ogg, Frederic Austin, 1878– and **Ray, P. O.** Introduction to American government. (Century political science ser.) Ed.2, rev. 1925. 938p. Century $3.75

Originally published in 1922 it was intended primarily for the sophomore student, but the needs of the serious-minded general reader were not ignored. Part one was an innovation in that it introduced the student to the principles and problems of government and part two also was unusual because it deliberately stressed criticism of existing political institutions and practices; principles were stressed rather than structural and procedural details. In its account of the national, state and local governments, it is an authority. The new edition has been brought fully up to date in content and various rearrangements have been made in order to emphasize necessary changes and new developments. There are descriptive and bibliographic footnotes and bibliographies at the end of the chapters.

The forerunner of Rousseau, Pestalozzi, Froebel and other philosophers in education, his influence on educational thought is comparable with that of Descartes and Bacon in science and philosophy. In matters of method and administration he looked far to the future, his *Great didactic* outlining a system of schools comparable to the American order of kindergarten, elementary and secondary schools, college and university. The first edition, published in 1896, was a close paraphrase from the original Latin, with extended biographical and historical introductions. The second edition has "corrected a few blemishes, made a few alterations and added a third introduction" which compares the doctrines of Comenius with a modern theory of education. In this edition there are seven pages of the works of Comenius arranged in chronological order of composition.

Locke, John, 1632–1704. Some thoughts concerning education; introd. and notes by R. H. Quick. 1913. Cambridge; Macmillan $1.90

The *Thoughts* originally consisted of letters to a friend advising him about the training of his son, and although thus addressed to a particular case concerned with the education of a "young gentleman," they exercised a very great influence upon the methods of the time and became a basic and substantial factor in the development of the English public school. After due attention to the question of forming habits of good health the establishment of "virtue, wisdom, breeding and learning," in this order, should be sought. All

must be brought about by intelligent, observing, gentle training in the manner most natural to the individual growth. A very pertinent course of reasoning and method for the curriculum of today.

An excellent text for colleges and norm schools on the history of elementary educati from the time of the Middle ages. It is distinct in that it emphasizes a relatively few selec movements, institutions and individuals as typi

instead of attempting a cyclopedic treatment of the whole field, and in that it deals primarily with schools, curricula and methods, as they have existed, rather than with reformers and theorists. Considerable space is devoted to Pestalozzi, Herbart and the Froebelians. Bibliographies are given at the ends of chapters.

Coe, George Albert, 1862– Law and freedom in the school. 1924. 133p. Univ. of Chic. $1.75

The philosophy of the project method and its place in social education is here set forth. The author parallels the English schoolmaster, Sanderson of Oundle, in aim and vision. Both see infinite possibilities in the child project as an approach to better and fuller democracy in the school and the nation. "The real educator leads society into freedom by leading children into it, and this he does by giving them practice in it . . . We grow free . . . only as we think, plan, act, judge, and enjoy together."

371.4 Systems of education

Barnard, Henry, 1811–1900. Pestalozzi and his educational system. (School bulletin publications) 1906. 751p. ports. Bardeen o.p.

Contents: Part 1, Pestalozzi and his work; Part 2, Selections from the writings of Pestalozzi.

This most complete exposition of the man and his work is of importance to the student of pedagogy. It is an enlarged edition of his *Pestalozzi and Pestalozzianism* published in 1860. A long bibliography of publications by and relating to Pestalozzi is included. The author, the great American educational reformer, the first United States commissioner of education (1867-1870), and advocate of many changes in our educational system, ranks with Horace Mann in his influence on the reform of elementary and high school administration and methods. Therefore his keen interest in Pestalozzi and all other original thinkers along these lines resulted in preserving their records and traditions. The *American Journal of Education 1856-1882* founded by Barnard is a mine of information concerning the educational progress of that period both in the United States and abroad.

The first paper is a criticism of the modern college as inadequate except for the needs of the scholar and the medical profession, due largely to a too formal school mechanism and the failure to direct closely the pre-professional training of students. The second treats the secondary schools, and presents the "realistic or genuine" point of view, recommending methods and courses which are adapted to present rather than past needs. In both cases practical suggestions for altering the present system are sketched.

"In 500 plates, of which the greater number are in color, costume of all ages and nations is treated and, together with dress, many of the surroundings and accessories of daily life. What little remains in Europe of characteristic costume is treated as fully as the costumes of the past. The text consists chiefly of a description of each figure and of some account of the sources from which the information is derived." v.1 is mainly explanatory text with an "Introduction générale" by the author. v.2-6 are mainly plates accompanied by descriptive text. There is a "Bibliographie du costume," v.1: 141-165; also a "Glossaire," v.1:169-246. A valuable work in English, now out of print, is Planché, *Cyclopaedia of costume,* 2v. (Chatto, 1876)

Arabian nights. Thousand and one nights; tr. by E. W. Lane; ed. by E. S. Poole. 1889. 3v. illus. Chatto 22s6d

Stanley Lane-Poole states: "The present edition is an exact reproduction of that edited by my father, with my great-uncle's final corrections, published by Mr. John Murray in 1859. Several reprints have testified to the popularity of the work . . . educated readers, who are capable of something more than the mere enjoyment of the romance, and desire to understand the character and habits of the actors and the spectators find in Mr. Lane's translation, and in his only, a complete satisfaction of their wants." It is not merely a scholar's edition, however, but appeals to the wide audience that wishes to know the famous books of the world as they really are and not, as is so often the case, edited beyond recognition. The many hundred wood engravings from original designs by William Harvey breathe the very spirit of the tales, help to make the reader live in the atmosphere of thrilling adventure. The notes are kept together at the ends of the chapters in which the tales are grouped so that the continuous reading of the stories is not interfered with. Every effort should be made to bring this edition into general use again. A volume of selections mainly from the Lane translation is *The Arabian nights* (Oxford, 1915. $1.50) Another four-volume edition of the same translation is *Arabian nights entertainments* (Bell, 6s) which appears also in Bohn's popular library, 2s each.

A translation of a work which has been regarded as perhaps the most notable example of modern Belgian literature. Although Rabelaisian in style, basically from Motley in its setting for war and the Inquisition, and indebted to the sixteenth century chap-books for its characterization of Ulenspiegel, the combined result is a production most individually of de Coster's own genius. Ulenspiegel himself is a "being as complex, as many-sided almost as humanity—all brightness of intellect, all warmth of heart, all honour and all dream—the immortal spirit of Flanders that knows not what it is to be beaten, whose last song must forever remain unsung."

400 PHILOLOGY

401 Philology. Origin

Jespersen, Jens Otto Harry, 1860– Language; its nature, development and origin. 1922. 448p. Allen; Holt $4

The work is largely a reconstruction of the author's *Progress in language* (1894). It gives "a biological or biographical science of language" by sketching the linguistic biology or biography of the speaking individual. Of the four sections into which the work is divided, the first gives a brief history of linguistic science; the fourth is a scientific exposition of the origin and development of language.

415 Grammar

Jespersen, Jens Otto Harry, 1860– Philosophy of grammar. 1924. 359p. Allen; Holt $4

The author here gives a connected presentation of his views on the general principles of grammar at which he has arrived after long years of studying of various languages, and of working upon his large work on English grammar of which he has brought out two volumes. He believes that the subject should not be studied merely in connection with ancient languages, known only through the medium of writing, but should be based upon direct living speech and only secondarily upon written and printed documents. There are constant references to sources and to other authorities throughout the texts. The author, an eminent philologist, is a professor in the University of Copenhagen.

Weekley, Ernest, 1865– Concise etymological dictionary of modern English. 1924. 984 col. Dutton $3

A practical, well-executed reference work for those who have "an educated interest in words and an intelligent curiosity as to their origins and earlier senses." This new compact edition has been reduced in size by shortening explanations, omitting lengthy illustrations of usage and decreasing the size of the type, not by the omission of words.

423 Dictionaries. Idioms

Century dictionary and cyclopedia, with a new atlas of the world. Rev. & enl. ed. 1911. 12v. illus. maps. Century o.p.

This most comprehensive and detailed American dictionary has as its special features a free inclusion and careful treatment of the technical terms of the arts and sciences, excellent illustrations and a large amount of encyclopedic information in the definitions. Pronunciation, derivation and quotation showing use are included for all words. Volume 11 is a pronouncing dictionary of proper names of all kinds, including names in art and literature as well as the usual type of name, with brief descriptive paragraphs. The atlas in volume 12 contains 118 detailed maps of the world with a complete index.

There has been no complete revision of the dictionary since its first publication, in eight volumes, in 1889-1891. A partial revision in 1901 extended the work to ten volumes. In 1909 two supplementary volumes appeared. This 1911 edition consists of the revised material of the 1901 edition and the pages (also revised) of the two supplementary volumes (1909), each volume having at its back its appropriate portion of the supplementary pages.

Funk and Wagnalls new Standard dictionary of the English language; prepared under the supervision of I. K. Funk, ed. by Calvin Thomas and F. H. Vizetelly. 1925. 2951p. illus. ports. Funk $16

This serviceable one-volume work is the most recently revised of the American dictionaries and is therefore the most useful for new words. It emphasizes present-day meaning, pronunciation and spelling, and subordinates historical information. The aim is to include all live words of the language in standard speech and literature of the day and terms commonly used dialectically. Simplified spelling is given preference, variations are noted and authorities are cited. Pronunciation is indicated by the respelling ordinarily used and also by the N. E. A. scientific alphabet. The 450,000 words including proper names are in one alphabet. Appendixes are: Disputed pronunciations, Rules for simplified spelling, Foreign words and phrases, and Statistics of population.

The first edition appeared in 1893 under the title *Standard dictionary.* An edition in 1901 contained 85 pages of addenda. This edition (1913) is a thorough revision printed from new plates. A special subscription edition contains as an additional feature a day-by-day history of the world.

Practical Standard dictionary of the English language; abridged by F. H. Vizetelly. 1925. 1309p. illus. Funk $5

This latest and largest abridgment of the *New Standard dictionary* contains about 140,000 words. In general the form and content of the entries of the larger work have been followed, although many definitions have been rewritten and condensed and much encyclopedic material has been omitted. The one alphabet feature has been retained. There is an appendix of foreign phrases. Published also as the *College Standard dictionary.* Another and smaller abridgment is the *Desk Standard dictionary* (Funk, 1925. $2.25) published also under the title *High school Standard dictionary.* It contains about 83,000 words and is illustrated.

Known variously as *Murray's dictionary,* the *New English dictionary,* and the *Oxford dictionary.* The purpose of this monumental work is to show the history of every word included from the date of its introduction into the language. The vocabulary is very full, comprising some 425,000 words that have been in use since 1150. Information given about each main word is detailed and includes identification,—i.e. spelling, pronunciation,—derivation and subsequent history, definitions and uses, with quotations to illustrate each sense. Its most important use is for historical information.

Issued in paper sections as completed, 9 full volumes are now available. Volume 10 is unfinished, the letter W being in preparation. An 18-volume edition is available also at $285.60.

Fowler, Henry Watson and **Fowler, F. G.** Concise Oxford dictionary of current English. 1924. 1064p. Oxford $3.25

The preparation of this excellent volume was authorized by the editors of the *New English dictionary.* Though based on this great work it makes use of material from other standard dictionaries. Definition, derivation and pronunciation are of scholarly accuracy, and an ingenious use of abbreviations and symbols makes possible a large amount of information in very little space. Special attention is paid to words in common use.

Webster, Noah, 1758–1843. New international dictionary of the English language; ed. by W. T. Harris and F. S. Allen. 1926. 2620p. illus. port. Merriam $16

The oldest and most widely used American dictionary has been revised numerous times since its first publication in 1828. The 1890 revision was the first to carry the title *International dictionary.* At the last revision, in 1909, the entire work was reset. In subsequent reprintings new words have been defined in an "Addenda" which precedes the main portion of the book. A special feature of arrangement is the divided page. The upper part contains the usual dictionary words with pronunciation, derivation, and concise definitions, synonyms and some illustrative quotations. The lower part of the page contains obsolete terms, variations in spelling, foreign phrases, abbreviations and minor words. Biographical and geographical names form two of the appendixes, other proper names appearing in the main parts of the book. Other appendixes contain arbitrary signs used in printing and writing and a classified section of illustrations. A reference history of the world by A. B. Hart, arranged by countries and indexed, is the feature of the special "Reference history edition."

—— Collegiate dictionary. 1925. 1222p. illus. port. Merriam $5

The largest abridgment of *Webster's New international* has been entirely revised in this third edition. It aims to include in its 106,000 words and phrases those for the general reader who wishes precise but not extended information, and those for the student which will satisfy the demands of his college work. The main portion of the dictionary is in one alphabet, supplemented by lists of Scottish words and phrases, rimes, foreign words and phrases, Christian names, abbreviations, biographical names and a pronouncing gazetteer. A smaller, excellent abridgment is *Webster's Secondary school dictionary* (Amer. bk. 1925. $2.40)

The latest revision of this famous work first published in 1852; continuous changes were made from 1879 to 1908, but with the necessity for resetting the entire work opportunity for greater revision has been given. New words and meanings of the past fifteen years have been added and the material incorporated throughout the main text. A few examples of alternatives and obsolete spelling have been removed but no alteration whatever in the general arrangement has been made and the archaic words so often sought for by authors remain. *Roget's international thesaurus* (Crowell, 1922. $3) is an attempt to bring an old stand-by up to date; it is founded upon the original Roget and contains numerous additions and modernizations. It is edited by C. O. S. Mawson. *Roget's treasury of words* (Crowell, 1925. $1) is abridged from the preceding title and is for desk use. It discards all obsolete, rare and bookish terms and makes further elimination. It also is edited by C. O. S. Mawson.

429 Anglo-Saxon

The following titles are all recommended by librarians and other specialists as of permanent value in the study of Anglo-Saxon.

The entries in the remainder of the 400s are for the most part not annotated except in cases where special material has made it necessary. The list is small because it is primarily for general public library purchase where such books do not circulate as a rule and the number bought is few. All titles mentioned, however, have been recommended by authorities familiar with the material. Only a few representative textbooks are included. For those libraries and individuals who wish to purchase for large or specialized reference collections the *New Guide to reference books* by I. G. Mudge (016) is an indispensable tool.

Comstock, Mrs. Anna (Botsford), 1854– Handbook of nature-study for teachers and parents. 1911. 938p. illus. Comstock $4

The work comprises a large part of the material first published in the *Cornell nature-study leaflets* (published 1903–1911, now out of print). The main purpose of these leaflets was to interest children in agriculture through nature study. The leaflets were written especially for untrained teachers and present all the facts available and pertinent concerning each topic in a simple, informal manner. Nearly three hundred leaflets are included and new material has been added. The subjects treated are the teaching of nature study, animal life, plant life, earth and sky.

A survey of the thought of the leading figures in the intellectual life of western Europe from Pliny to Cecco d' Ascoli, which in scope and mass of accurate details parallels Frazer's, *The golden bough.* The arrangement is chronological, giving a critical review of each author, and a vivid impression of the position he held in the world of his day. The work contains much that is curious, quaint and amusing presented in a readable manner. It is unexcelled as a reference book both for content and convenience of arrangement.

Cajori, Florian, 1859– History of mathematics. Ed.2, rev. 1919. 514p. diagrs. Macmillan $4

The history of the progress of the science of mathematics is presented with remarkable accuracy and comprehensiveness. Beginning with the notation of numbers by the early Babylonians, the book traces the development of the subject by various peoples throughout the centuries up to our own time. It includes a very full discussion of the theory of functions, the theory of numbers, and applied mathematics. In the second edition the por-

tions of the book dealing with early history have been partly rewritten, while the chapters on recent mathematics are greatly enlarged and are almost wholly new.

Keyser, Cassius Jackson, 1862– Human worth of rigorous thinking. Ed.2, enl. 1925. 323p. Columbia $3.25

Essays and addresses which aim to prove the worth of rigorous thinking. The first essay considers the human value of mathematics and applies Bertrand Russell's test question: In what way does it contribute to the beauty of human existence? Nearly every essay deals with the fundamental presuppositions of mathematics, so as a whole the volume forms a contribution to the philosophy of mathematics. The second edition is enlarged to include "Man and men" and "Educational ideals that are most worthy of loyalty." The author is professor of mathematics at Columbia university.

—— Mathematical philosophy; a study of fate and freedom. 1922. 466p. Dutton $4.70

These "lectures for educated laymen" propose to disclose the fundamental connections between mathematics and philosophy. They deal with concepts which the author designates as pillar-concepts in the edifice of mathematics, such as function, propositional function, postulate system, finitude, infinity, transformation and invariance. The significance of these concepts and their use in outlying fields of thought are disclosed as well as the relation of mathematics to other great forms of intellectual activity, especially its bearings upon the universal interests of the human spirit.

Fabre, Jean Henri Casimir, 1823–1915. The heavens; tr. by Dr. E. E. Fournier d'Albe. 1925. 336p. illus. diagrs. Lippincott $5

Fabre begins his subject at the very beginning and builds his teaching entirely on common, everyday observation. "The plan of the book is simple and effective. The descriptions are severely simple and lucid, and convey to the reader the dignity of the subject in a way that cannot fail to be impressive. Many passages are quite poetical, while the charm of others lies in their wealth of descriptive allusions. Even the elementary mechanics become absorbing when clothed in such vivid language, and the explanation of how the earth is weighed, and of such subjects as parallax, inertia, and centrifugal force, are presented in a most attractive style."

National research council. International critical tables of numerical data, physics, chemistry and technology. Ed. by E. W. Washburn and others. 1926. v.1, diagr. McGraw-Hill $7

This compilation was projected at the organization meeting of the International union of pure and applied chemistry and prepared by a body of experts under the auspices of the International research council and the National academy of sciences. Volume one deals with national and local systems of weights and measures, symbols, basic constants, conversion data, dimensions, definitions; laboratory technique; method of arrangement of chemical substances and systems; physical properties of chemical substances; radioactivity; astronomical and geodetic data; aerodynamics. The completed set will be in five volumes.

531 Mechanics

Merriman, Mansfield, 1848– Elements of mechanics; forty lessons for beginners in engineering. 1905. 172p. diagrs. Wiley $1.50

A textbook of rational mechanics, suitable for self-instruction and requiring a knowledge of only elementary mathematics.

Mechanics

2107 5-3739

Poorman, Alfred Peter. Applied mechanics. Ed.2. 1923. 293p. diagrs. McGraw-Hill $2.75

A textbook intended for undergraduate courses in engineering schools. It assures a knowledge of the principles of general physics and calculus. Basic principles are clearly presented and illustrations show applications of them to engineering problems. The two unusual features in the method of presentation are the extended use of the graphic method of solution and the large number of illustrative examples solved in detail to show the relation between the principles and problems. In the second edition the three chapters on force systems, in the section devoted to Statics, have been expanded to six, non-coplanar systems being treated separately from coplanar systems. Other material has been rearranged to obtain a more logical order of subjects, and additional illustrative examples have been included.

Mechanics, Applied

Pullen, William Wade Fitzherbert. Mechanics, theoretical, applied, and experimental. 1902. 381p. diagr. Longmans $2.20

The author has stressed the following three features: discussion of the principles of the subject; descriptions of and instructions for carrying out experiments in the laboratory; and the application of the principles to the solutions of problems.

532 Hydraulics

Lea, Frederick Charles. Hydraulics for engineers and engineering students. Ed.4. 1923. E. Arnold; Longmans $6

Invaluable to chemical engineers who desire to master the fundamental principles of hydraulics in order to make more intelligent application of formulas.

Hydraulics

2110 26-26929

Merriman, Mansfield, 1848– Treatise on hydraulics. Ed.10, rev., with the assistance of Thaddeus Merriman. 1916. 565p. illus. Wiley $4

A lucid exposition of fundamentals of hydrostatics and dynamics for technical students, but thorough and simple treatment makes it a handy reference book for practicing engineers.

Hydraulics

2111 16-19679

Unwin, William Cawthorne, 1838– Treatise on hydraulics. Ed.2. 1912. 339p. illus. Black; Macmillan $4.25

A scholarly work, distinguished by clearness of statement, balance and general accuracy. Russell's *Textbook on hydraulics* (Holt, 1909. $3.50) an equally good text, is devoted to the more common and important problems of hydraulics, omitting hydraulic motors and other applications.

534 Sound

Barton, Edwin Henry, 1858– Text-book on sound. 1908. 687p. illus. tables, diagrs. Macmillan $5

This textbook on sound includes both the experimental and theoretical aspects. The mathematical portions are restricted to the elements of the calculus, though often simpler alternative methods are provided, making the work intelligible to those unfamiliar with the calculus. Experiments suitable for laboratory exercise or for lecture illustration are described in detail. Musical instruments are discussed more fully than usual in physics textbooks.

Sound

2113 9-10049

Bragg, Sir William Henry, 1862– World of sound; six lectures delivered before a juvenile auditory at the Royal institution, 1919. 1922. illus. diagrs. Bell; Dutton $2

The author has produced a delightful nature book, clear and simple in style, never passing beyond the understanding of a juvenile reader, yet in-

teresting to general readers because of the many curious facts it contains. The first two chapters study wave motion in general with special reference to vibrations which produce sound. The rest of the book takes up characteristic sounds of the town, the country, the sea and of war, and under these headings explains common sounds as well as some unusual ones.

Sound

2114 (21–20674)

Miller, Dayton Clarence, 1866– Science of musical sounds. 1922. illus. Macmillan $3

Eight lectures delivered at Lowell institute, in which are discussed in an elementary manner for the subject, characteristics of tones, methods of recording and photographing sound waves, analysis of harmonic curves, tone qualities of musical instruments and, in the last chapters, the latest investigations in which the author has had so large a part. It will interest musicians and students of physics. There are many illustrations and diagrams and a list of references (8p.) The 1922 edition is practically a reprint of the 1916 edition.

Sound || Music—Acoustics and physics

This standard work presents the most important optical researches from the earliest times up to recent date. In addition to the physical theory it contains a detailed account of the most important experiments and of physical measurements such as velocity of light, wave lengths and refractive indices. Graphic methods are used in the solution of problems in diffraction. References are given to original sources. In the fourth edition errors and inaccuracies have been corrected, Fuller treatment has been given to dispersion, radiation, phenomena in a magnetic field, and to the electromagnetic theory.

536 Heat

Croft, Terrell Williams, 1880– ed. Practical heat. (Library of power plant practice) 1923. 2v. illus. McGraw-Hill $5

A book on heat and the practical applications of heat, which may be intelligently followed by persons of limited mathematical attainments. It is a clear and complete exposition of the fundamental principles of heat as applied to engineering practice. Well illustrated.

Heat

2124 23–8772

Preston, Thomas, 1860–1900. Theory of heat. Ed.3. 1919. Macmillan $8.50

The author's object has been to treat the subject comprehensively so that the account will cover both experimental and theoretical aspects. This third edition omits parts no longer of much scientific or historical interest; but much new matter has been added, especially in accounts of later experimental work; and a new chapter on the kinetic theory of gases has been added.

536.7 Thermodynamics

Ennis, William Duane, 1877– Applied thermodynamics for engineers. Ed.4. 1915. 503p. illus. Van Nostrand $5

The writer aims to present ideal operations in thermodynamics, to show how they are modified in practice and to amplify underlying principles, dealing with engineering aspects and not with machine design. The calculus has been employed only when necessary and formulas are avoided. The subject of compressed air receives some treatment; a brief exposition of multiple-effect distillation is presented and new entrophy charts have been prepared for ammonia, ether and carbon dioxide. Problems are included. The work is scholarly, but less technical than Zeuner's *Technical thermodynamics* (Van Nostrand, 1907. $8)

Jackson, Dugald Caleb, 1865– and **Jackson, J. P.** Elementary book on electricity and magnetism and their applications. Rev. and enl. by N. H. Black. 1919. 598p. illus. diagrs. Macmillan $2.20

Fundamental principles of electricity and magnetism are simply and clearly stated. Illustrative examples are worked out in the text and problems based on electrical industries are presented. Brief, clear summaries are placed at the end of each chapter, together with a series of questions on the material treated. The text is readable and authoritative.

Approximately a third of this volume is devoted to the historical background of present day developments in electrical research. The developments after 1897 are discussed in the remainder of the book. There are chapters on radioactivity, atomic architecture, electromagnetic waves, and atomic aggregates. The style is simple. Glossary and index.

Timbie, William Henry, 1877– Elements of electricity. (Wiley technical ser.) Ed.2. 1925. 624p. illus. tables, diagrs. Wiley $3.50

In this exposition of the elements of electricity abstract discussion is avoided and each new principle is illustrated by numerous examples which explain it and develop an ability to use the theory. Except in the chapter on alternating currents, where trigonometry is used, the mathematics required has been confined to simple algebra. The trigonometry used is explained in the appendix. The treatment of the text as a whole is simple and direct. The principal changes in the second edition are a more complete discussion of the magnetic circuit in accordance with latest practice, a fuller treatment of alternating current phenomena, the application of alternating current theory to radio, and new chapters on the vacuum tube, the electron theory and the electrostatic circuit.

538 Magnetism

Underhill, Charles Reginald, 1874– Magnets. 1924. 468p. illus. diagrs. McGraw-Hill $4

A practical treatise on electromagnetic devices, their circuits, and the specific forms and characteristics of electromagnets and permanent magnets employed. This detailed college text is comprehensive yet non-technical. Equations are used as sparingly as possible, the mathematical deductions having been translated into the text, with the law of conservation of energy as a basis, and the mathematics then eliminated.

Electromagnets

2135 25–335

—— Solenoids, electromagnets and electromagnetic windings. Ed.2, rev. 1921. 342p. Van Nostrand $3

This is practically the only book in English on solenoids. It embodies the result of much original research and is of practical value to the manufacturer of electrical apparatus as well as to the electrical profession. The material on electromagnets is more fully covered in the author's later work *Magnets.*

Beery, Pauline Gracia. Chemistry, applied to home and community; a text-book and laboratory manual. Ed.2. 1916. illus. 534p. Lippincott $3.50

The author's purpose is to point out to the college woman the relation between the science of chemistry and the problems of everyday life, to teach her something of the composition, the methods of refining, and the properties of articles in common daily use so that she may judge values wisely. The book forms a good foundation for more advanced courses in nutrition cookery, industrial art, textiles, applied art, and housewifery and also presents chemical subject matter having a direct application to the problems of a woman's life. The text presupposes a previous knowledge of inorganic chemistry but includes in the Appendix an "Outline of systematic organic chemistry," for the benefit of those without training in chemistry. The treatment is thorough and original. There are good bibliographies at the ends of chapters. A second edition has just appeared, July 1926.

The author advances the theory that the progress of a nation depends upon its general appreciation of science. He blends philosophical theories and the practical side of chemical science, hoping to arouse the interest of the general reader and appeal to his imagination. It is intended especially for those in school who are not destined for a scientific career. In the third edition the subject matter has been thoroughly revised; new chapters have been added on radio-activity and atomic structure, the rare gases of the atmosphere and metals and their alloys.

Rowley, Hannah Teresa and **Farrell,** Mrs. **H. L. W.** Principles of chemistry applied to the household. 1918. 284p. illus. ports. Bost. cooking school mag. $1.50

This interesting book for the school is a laboratory manual and chemistry text combined. It has the advantage of drawing interest by the experiments instead of by merely discussing abstractions. The first third is devoted to an introduction to the main principles of chemistry. The remainder is an application to human physiology, food preparation and sanitation. It answers briefly a want common to pupils who study chemistry and household arts separately with the connection not always made apparent. There are many tables, chapter bibliographies, and interesting illustrations.

Sherman, Henry Clapp, 1875– Chemistry of food and nutrition. Ed.2, rev. 1918. 454p. illus. Macmillan $2.40

A fairly technical text, dealing mainly with food values and food requirements of man. There are exceptionally good lists of references at the end of each chapter and the tables on the composition of foods, found in appendix B are valuable. Appendix A gives the nomenclature and classification of proteins.

A standard work, characterized by simplicity of arrangement and judicious choice of methods, presenting only those most approved. It is comprehensive and up-to-date. The entire text of volume one has been reset and new material added but the general treatment remains the same. Volume two has been carefully revised, the results published by the Bureau of standards at Washington being substituted for previous German data. The appendix has been enlarged and numerous additions and changes made throughout.

Fournier d'Albe, Edmund Edward, 1868– The moon-element. 1924. 166p. illus. ports. Unwin; Appleton $3

A popular and simple account of the history of selenium, a chemical element discovered about one hundred years ago. It describes its characteristics and its application in picture transmission, television and the talking film. Nearly one-third of the book is devoted to a description of the octophone, an instrument invented by the author which, by the use of selenium, converts light into sound, enabling the blind to read.

—— Modern inorganic chemistry. New ed. 1925. Longmans $4.25

The author maintains that a course in chemistry should develop skill in observation and experiment, memory and knowledge of relevant facts, ability to reason and think in a logical way, imagination and an ability to criticize and judge impartially, and has planned his textbook accordingly. It gives a good foundation for a knowledge of the fundamentals of inorganic chemistry as regards both the principles and the properties of the more important elements and compounds. The new edition has been entirely reset, several sections have been completely rewritten and the others thoroughly revised. The size of the book has been increased by nearly two hundred pages.

Cohen, Julius Berend, 1859– Organic chemistry for advanced students. Ed.4. 1923. 3v. illus. diagrs. E. Arnold; Longmans $6.50 each

Chemists and advanced students, for whom this work is intended, find it fascinating. Part I deals with reactions, Part II, with structure and Part III, with synthesis. The fourth edition has been somewhat increased in size, new views of valency and chemical reaction have been included, three new pages are devoted to modern theories of catalysis. The section on condensation has been enlarged and partly rewritten. The chapter on chemical dynamics has been revised and rearranged and now includes sections on photochemical reactions and influence of temperature upon reaction velocity.

Mathews, Albert Prescott, 1871– Physiological chemistry; a text-book and manual for students. Ed.4. 1925. 1233p. illus. Wood $6

The writer aims to stimulate the curiosity of the reader so that he will be impelled to further research. The book deals with the chemistry of protoplasm and the cell; the mammalian body considered as a machine, its growth, maintenance, energy, transformations and waste substances, and devotes some two hundred pages to practical work and methods. Whenever possible definite experiments have been given rather than conclusions only. The bibliographies at the end of the chapters refer mostly to recent material. The fourth edition brings the text up to date. Much new matter has been added, particularly on the subjects of carbohydrates, blood clotting, chemistry of the skin, the eye and the defense against disease.

Wyckoff, Ralph Walter Graystone, 1897– Structure of crystals. (American chemical society. Monograph ser.) 1924. 462p. illus. Chemical catalog $6

This monograph outlines present methods of crystal structure deduction and treats the available diffraction data from the more exacting standpoint which they make possible. Analytical complexities are reduced to a minimum (for instance, by deducing expressions for only the simplest crystals) and stress is laid only on the necessary underlying assumptions. To make the text as brief as possible and yet maintain clearness, extensive use has been made of diagrams and figures. Brief discussions of the phyical properties of x-rays and the symmetry properties of crystals have been included. The appendix contains a bibliography of crystal structure data and some useful tables.

This textbook is intended to be used as a first course in physical geology and to be not only of cultural interest but to form a foundation for further studies in engineering, mining, metallurgy, forestry and chemistry. It presents the broad facts and principles of science from the latest viewpoint and maintains a good balance in the choice and treatment of subjects. It is the most up-to-date and authoritative summary of the geology of the United States. Volume I deals with physical geology; volume II, with historical geology. The second edition has been revised with a view to making it better adapted for teaching and its literary style has been improved.

Knott, Cargill Gilston, 1856– Physics of earthquake phenomena. 1908. 283p. illus. diagrs. Oxford $4.70

While professor of physics at the University of Tokyo the author studied earthquakes and their causes at first hand. In this book he shows what a remarkable lead the Seismological society of Japan took in following up problems already under investigation and in making new paths. He treats the subject not as a branch of technical geology but as belonging to the wider domain of natural philosophy, both experimental and mathematical.

Contents: Introduction; Earthquake phenomena; Seismic surveys; Instrumental seismology; Seismometry; Earthquake distribution; Periodicities; Elasticity; Elastic waves; Unfelt shakings of the earth; Seismic radiations; Miscellaneous relations.

Kraus, Edward Henry, 1875– and **Holden, E. F.** Gems and gem materials. 1925. 222p. illus. McGraw-Hill $3

An interesting and useful book of reliable information based upon a course of lectures offered at the University of Michigan, addressed especially to those engaged in the sale of gem materials. It will also interest those who have had no previous training in mineralogy. Part 1 discusses the properties and forms of gems; part 2 describes the various minerals and materials used as gems. It is well illustrated.

The whole fossil record from the dawn of life to the advent of man is depicted in this excellent and well illustrated epitome. It is not an exact translation of the German original; the text has been revised and brought up to date with the aid of many specialists. This is particularly true of the second edition of volume two (1913) which deals with fishes, amphibians, reptiles and birds. The third volume discusses mammals.

Scott, Dukinfield, Henry, 1854– Studies in fossil botany. Ed.3. 1920-1923. 2v. illus. Black; Macmillan $7.25 each

The results of paleontological inquiry which seem to be fundamental from the botanist's point of view are presented to the botanical reader in these fourteen papers which are expanded from lectures given at University college, London, in 1896. Discussion is limited to pteridophytes and gymnosperms. The author assumes an acquaintance with botany and geology.

Ecological society of America. Naturalist's guide to the Americas; ed. by V. E. Shelford. 1926. 761p. maps. Williams $10

The National research council, American society of zoologists, Botanical society of America and the United States forest service have aided in the preparation of this volume. The principal subjects treated are mammals, birds and general ecology, including plants. Data on invertebrate or lower vertebrate life are strikingly absent and little information is given on mollusca. Each chapter is written by an authority familiar with the area dealt with and describes the climate, fauna and flora of the area, lists literature on the section referred to, and indicates areas which should be preserved. Although topics vary with the author, area and conditions, care has been taken to make nomenclature uniform. A list of organizations interested in the preservation of natural conditions is given.

572 Ethnology. Anthropology

Goldenweiser, Alexander A. Early civilization. 1922. 428p. illus. maps. Harrap; Knopf $5

A noteworthy work by a scholar who presents his subject authoritatively yet simply. It does not treat of ancient cultures, as the title would imply, but of nearly or quite contemporaneous tribes living under primitive conditions. Five of these he describes in part one. In part two this primitive civilization is discussed "in its constituent aspects —economic conditions and industry, art, religion and society." In part three he outlines and crit-

A valuable work which has been described as excellent for the student and both entertaining and stimulating to the general reader. It sums up the present status of the whole science of anthropology, defining central problems and offering such solutions as seem to have been proven valid. As professor of anthropology at the University of California the author has had long experience in presenting material in the way which makes the subject clear and definite, and as an explorer for and curator of museums he has been able to make application of all theories, the results of which come to us in delightful book form.

Thomson, John Arthur, 1861– New natural history. 1926. v.1, illus. Putnam $6

An attractive book, entertainingly written, emphasizing the "linkages of life" and giving considerable space to the "ways in which living creatures are suited to the picturesque variety of habitat from pole to pole." It treats animal behavior at length and pictures animate nature as a continuous drama. In style and format it resembles the author's *Outline of science.* Profusely illustrated in color, and in black and white. The set, which is to be in three volumes, will be welcome in children's rooms and in adult collections.

White, Gilbert, 1720–1793. Natural history of Selborne; with notes by Richard Kearton. 1925. 248p. illus. McBride $6

Letters to Thomas Pennant and to Daines Barrington form the basis of this delightful volume which describes the parish of Selborne, its trees, birds and flowers. It has become a natural history classic praised and enjoyed by scientists of all countries. First printed at Horace's Head, Fleet street, London, in 1789, it has gone through many editions. This one is distinguished for its illustrations which are photographs of Selborne.

Beebe, Charles William, 1877– Arcturus adventure; an account of the New York zoological society's first oceanographic expedition. 1926. 439p. illus. maps. Putnam $6

Another enthralling narrative by the man who "has the faculty of making laboratory research read like a fairy tale" is here presented to us in most attractive form, beautifully illustrated. The origin of the idea of the expedition, the gathering together of all possible paraphernalia, scientific and domestic, the sailing, the discoveries, the joys and the hard labors are so happily woven into one amazingly delightful story that it seems impossible to connect this thrilling adventure with a so-called learned society bent on meticulous research. Science will reap untold benefits from the expedition and mankind continuous delight in the perusal of such a charming informative volume.

Fabre, Jean Henri Casimir, 1823–1915. Life of the spider; tr. by Alexander Teixeira de Mattos. New ed. 1919. Dodd $2.50

Possibly the best known and best liked of all Fabre's books which have appeared in English. The result of patient observation reveals to us the domestic habits and the homes of the spiders and we are told about it all in the charming phraseology of this great poetic naturalist. The translation has not destroyed the happy diction of the original. The essays are selected from the ten volumes which make up the "Souvenirs entomol-

"In Fabre's writings we have combined keenness of observation and interpretation, a genial philosophy and a polished and fascinating style." In the twenty-one chapters of this particular volume of "Souvenirs entomologiques" the more familiar and interesting insects are dealt with. Their habits and their romances are enlarged upon as revealed through the author's own study and observation. Among the insects treated are the cigale, mantis, golden scarabæus, cricket, Sisyphus beetle, bee-hunter, emperor moth, banded monk, elephant beetle, pea-weevil, grey cricket and pine chafer. Among other volumes which have been so perfectly and charmingly translated by Teixeira de Mattos may be mentioned: *Life of the fly* (1913. $2.50) *Life of the grasshopper* (1917. $2.50) *The mason-bees* (1914. $2.50) and *The mason-wasps* (1919. $2.50)

Hammond, John Hays, 1855– The engineer. (Vocational ser.) New and enl. ed. 1924. 218p. Scribner $1.25

A brief survey of the nature of engineering, written so as to form a vocational guidance book for high school pupils. It describes the possibilities in mechanical, civil, mining, electrical, chemical, marine, and military engineering, the advantages and disadvantages of the profession in general, and the training and qualifications of the engineer. In the new edition the only revision consists of an introduction and two appendixes describing the courses in commercial engineering offered in some of the larger universities, with the requirements necessary for admission. A short bibliography has also been added.

Fish, John Charles Lounsbury, 1870– Engineering economics, first principles. Ed.2. 1923. 311p. tables. McGraw-Hill $3

Deals with general principles rather than specific cases. Meritorious features are the completeness and clear arrangement of the table of contents, and the concise synopses preceding chapters. Treats of many topics including interest, sinking funds and other financial problems, items of first cost, depreciation, salvage, maintenance costs and practice of estimating. The second edition has been expanded ninety-four pages.

Batson, Reginald George Cyril, 1885– and **Hyde, J. H.** Mechanical testing. (Directly-useful technical ser.) 1922–23. 2v. illus. Dutton v.1, $9; v.2, $10

Contents: v.1, Testing of materials of construction; v.2, Testing of prime movers, machines, structures and engineering apparatus.

Volume one deals with fundamental principles and describes various machines and test methods with chapters on ordinary commercial testing and the testing of various materials. Reading references are given at the end of the chapters. Volume two has eight chapters on dynamometer testing and others on gears, springs, lubricants, concrete and many other materials. It is clearly and copiously illustrated. The authors are associated with the British national physical laboratory.

Merriman, Mansfield, 1848– ed. American civil engineers' handbook. Ed.4, rev. & enl. 1920. illus. diagrs. Wiley $7

A valuable and authoritative reference book. In many respects better than Trautwine. The fourth edition has been thoroughly revised and so much enlarged that its title has been changed from Pocket-book to Handbook. To Section 1 is added an appendix on colored paper, giving the Searles mathematical tables; Section 3A is entirely devoted to electric railroads; the new Section 17 treats of irrigation and drainage. All the other sections have been enlarged and brought up to date.

621.3 Electric engineering

Croft, Terrell Williams, 1880– American electricians' handbook. Ed.2. 1921. 823p. illus. McGraw-Hill $4

A revised edition of one of the most complete, compact and usable handbooks ever prepared for the practical needs of workers employed in operating electrical machinery and installing electric wiring; it also aids them in selecting their material.

Electric engineering—Handbooks, manuals, etc.

2610 21–13977

—— Electrical-machinery erection. 1925. 314p. illus. McGraw-Hill $3

Describes the methods and processes which are, in modern practice, employed in the mechanical installation of electrical machinery, from the unloading of the apparatus from the car to its final fixing and aligning in its ultimate operating location. Index.

Electric machinery

2611 25–10388

—— Practical electricity. Ed.2. 1920. 646p. illus. McGraw-Hill $3

An excellent textbook for self-instruction, presenting a working knowledge without going into mathematics beyond arithmetic.

Electricity || Electric engineering

Morecroft, John Harold, 1881– and **Hehre, F. W.** Electrical circuits and machinery. 1923–25. 3v. illus. Wiley v.1-2, $4 each; v.3, $2

Contents: v. 1, Continuous current circuits and machinery; v. 2, Alternating currents; v. 3, Experiments.

Designed for use in engineering schools, it stresses fundamental principles. The information is accurate, and clearly presented, and it is amply illustrated. The experiments are intended to give an acquaintance with all types of machinery and the scheme of testing, to bring out the most important characteristics.

2622 25–1009

Standard handbook for electrical engineers; ed. by F. F. Fowle. Ed.5, rev. 1922. 2137p. illus. McGraw-Hill $6

Prepared by a staff of specialists, the book is intended primarily as a reference book of practical information and data for practicing engineers and a supplement to the standard textbooks employed in teaching electrical engineering in colleges and universities. Emphasis has been placed upon practical data with descriptive material limited and reference to standard works given for further reading. The fourth edition (1915) was virtually a new book in content as is also the present, fifth edition; but the general arrangement has remained the same.

621.4 Air, gas and other engines

Chalkley, Alfred Philip. Diesel engines for land and marine work; introd. by Dr. Rudolf Diesel. Ed.5. 1922. illus. Van Nostrand $6

Deals with construction installation and operation. The fifth edition describes the newest types of engines but in other respects is practically the same as the earlier editions. The theoretical portion of the book is unaltered but the practice introduced since the last edition (1915) is included. The engines described are strictly European. The volume is well written and finely illustrated. "No engineer should fail to include it in his five-foot bookshelf."

Judge, Arthur William, 1887– Testing of high speed internal combustion engines, with special reference to automobile and aircraft types and to the testing of automobiles. 1924. 392p. illus. Chapman; Van Nostrand $7.50

The subject is thoroughly covered, the general principles are given, also general accounts of testing equipments and detailed descriptions of various methods and instruments employed. Although much is of a fairly elementary nature, there is enough advanced matter which, together with footnote references, makes the book of value to the technician and the research engineer.

Gas and oil engines

2660 (25–17363)

Morrison, Lacey Harvey, 1881– Diesel engines. 1923. 598p. illus. McGraw-Hill $5

Gives full information on the subject in non-technical language, answering the questions of when and why to install Diesel engines and describing the various forms now available. The construction and operation is explained and directions for keeping them in good condition are given. The actual operating costs of Diesel engines now in use are given.

621.6 Pumping engines

Greene, Arthur Maurice, 1872– Pumping machinery. Ed.2, rev. 1919. 703p. illus. Wiley $4.50

A full, technical work, based on lectures to mechanical engineering students; it outlines the development of pumping machinery and describes a number of common forms of pumps and designs.

A good bibliography of twelve pages is included. Collins' *Pumps* (McGraw-Hill, 1908. $1.50) is an untechnical work devoted to running of pumps.

Pumping machinery

2669 19–5697

Sargeant, E. W. Centrifugal pumps and suction dredgers. Ed.2, rev. 1918. 188p. illus. Griffin; Lippincott $6

Discusses the practical and commercial side of centrifugal pumps manufacture. Copiously illustrated.

621.7 Mills. Factories. Engineering works

Farquhar, Henry Hallowell. Factory storekeeping; the control and storage of materials. 1922. 182p. illus. McGraw-Hill $2.50

Describes the details of factory storekeeping; the books and forms used, methods of replenishment of materials, of storage and disbursement.

Factory management

2672 22–16070

Hobart, James Francis, 1854– Millwrighting. Ed.2, rev. & enl. 1919. 454p. illus. McGraw-Hill $4

Covers in detail all phases of millwrighting from factory location to the installation of electric motors. Presentation clear and concise.

Mill and factory buildings

2673 19–16641

Hopp, Adolf and **Neubecker, William.** Estimating sheet metal work. 1922. 417p. illus. U. P. C. bk. $3

For the man conducting a sheet-metal working business or concerned with estimating on sheet-metal working jobs. The authors write from practical experience.

Sheet-metal work || Neubecker, William, 1864– joint author

2674 22–7528

621.8 Principles of mechanism

Jones, Franklin Day, 1879– Mechanisms and mechanical movements. 1918. 310p. illus. Industrial $3

An excellent book for designers, draftsmen, mechanical engineers and inventors which classifies mechanisms and explains the control of motion to secure changes of direction, velocity and time of action.

Machinery || Mechanical movements

2675 18–12473

Kimball, Dexter Simpson, 1865– and **Barr, J. H.** Elements of machine design. Ed.2, rev. & enl. 1923. 446p. illus. Wiley $4

A comprehensive study of the principles of design in which the treatment is simple and direct giving only such data as are needed to verify or modify the logical theory. The changes in the new edition are rearrangement of material and a chapter on balancing.

Machinery—Design || Barr, John Henry, 1861– joint author

2676 23–9663

Logue, Charles Hays, 1875– American machinist gear book; rev. by Reginald Trautschold. (Library of machine shop practice) Ed.3. 1922. 353p. illus. McGraw-Hill $3

Practical data for cutting, molding and designing commercial types of gears; with a general outline of underlying principles. Important additions in the third edition are sections devoted to bevel gears, an exposition of the Williams system of internal gearing and material on the rolling process of gear production.

Gearing || Trautschold, Reginald, ed.

2677 22–24462

Schwamb, Peter, 1858– and others. Elements of mechanism. Ed.3, rev. & enl. 1921. 372p. diagrs. Wiley $3.50

A clear and systematic presentation of fundamental problems and methods of analysis. Well illustrated. Suitable for classroom use or home study and for reference.

Hoisting machinery || Conveying machinery || Wright, Roydon Vincent, 1876– ed.

2681 21-20127

Zimmer, George Frederick, 1854– Mechanical handling and storing of material; being a treatise on the automatic and semi-automatic handling and storing of commercial products. Ed.3, rev. 1922. 804p. illus. Lockwood; Van Nostrand $20

A full, clear and skilful presentation of the subject, covering practically every class of conveying apparatus.

Conveying machinery || Hoisting machinery

2682 (22-17475)

621.87 Elevators

Jallings, John H. Elevators. 1918. 401p. illus. Amer. technical soc. $2.50

A practical treatise giving the development, design and operation of all types of elevators: hand, steam, belt, hydraulic and electric.

Elevators

2683 18-11289

621.89 Lubrication and lubricants

Battle, John Rome. Handbook of industrial oil engineering. Ed.2, rev. 1923. 1141p. illus. Lippincott $10

A valuable reference book covering practically the whole field of oil from the refining of the crude to its many applications as a finished product. It is replete with data, tables, diagrams, and illustrations. Includes the *Lubricating engineer's handbook.* A second volume on liquid fuels is in preparation.

Oils and fats || Lubrication and lubricants

2684 23-15941

Thomsen, T. C. Practice of lubrication. 1920. 607p. illus. McGraw-Hill $6

A treatise which is valuable to engineers, oil manufacturers and chemists, treating of the origin, nature and testing of lubricants, and methods of use for various machines and parts.

Lubrication and lubricants

2685 20-17580

621.9 Machine tools

Burghardt, Henry D. Machine tool operation. 1919-22. 2v. illus. McGraw-Hill v.1, $2.25; v.2, $2.75

Contents: Pt. 1, The lathe, bench work, and work at the forge; Pt. 2, Drilling machine, shaper and planer, milling and grinding machines, spur gears and bevel gears.

An excellent textbook for schools where machine tool operation is taught. The construction of machines and the operations are clearly explained and illustrated and numerous questions on the various operations are provided.

Machine-shop practice || Lathes

2686 20-26190

Colvin, Fred Herbert, 1867– and **Stanley, F. A.** American machinists' handbook and dictionary of shop terms. Ed.4, rev. & enl. 1926. 972p. illus. McGraw-Hill $4

A conveniently arranged presentation of tools, processes and accepted practice including tables and data for machine shop or mechanical drafting room.

Machine-shop practice || Stanley, Frank Arthur, 1874– joint author

2687 26-26934

—— and **Haas, L. L.** Jigs and fixtures. (Library of machine shop practice) Ed.2, rev. & enl. 1922. 237p. illus. McGraw-Hill $2.50

A presentation of the fundamental principles of design, arranged in the order of their application, showing many types in actual use and giving suggestions for various cases.

Machine-tools || Haas, Lucian Levant, 1881– joint author

2688 22-24460

—— and **Stanley, F. A.** Machine tools and their operation. (Library of machine shop practice) 1922. 2v. illus. McGraw-Hill $4 each

An excellent book on machine-shop practice of value to both beginner and advanced worker.

Contents: Pt. 1, Lathes, drills, hand and automatic screw machines, screw machine tools and boring. Pt. 2, Planers, shapers, slotters, broaching, milling, gear cutting and grinding.

Machine-tools || Machine-shop practice || Stanley, Frank Arthur, 1874– joint author

2689 22-24805

Hamilton, Douglas Thomas, 1885– and **Jones, F. D.** Automatic screw machines. 1920. illus. Industrial pr. $3

A treatise on the construction, design and operation of automatic screw machines and their tool equipment.

Machine-tools || Jones, Franklin Day, 1879– joint author

2690 16-22575

Jacobs, Frederic Burnham, 1880– Abrasives and abrasive wheels. 1919. 337p. illus. Henley $3

An authoritative and plainly written text on the manufacture and use, for engineers, shop and factory superintendents, and general mechanics.

Grinding and polishing

2691 19-12287

Jones, Franklin Day, 1879– ed. Modern toolmaking methods. 1920. illus. Industrial $3

A practical, authoritative treatise on accurate threading, bench lathe work, precision measurements and general shop practice.

Machine-tools

2692 15-12647

Smith, Robert Henry. Text-book of advanced machine work, prepared for students in technical, manual training, and

trade schools, and for the apprentice and the machinist in the shop. Ed.8, rev. & enl. 1925. 802p. illus.
Industrial education bk. $3.25

A practical, well illustrated manual of machine-shop practice.

Machine-shop practice

2693 25–14313

Stanley, Frank Arthur, 1874– Punches and dies, layout, construction and use. 1919. 434p. illus. McGraw-Hill $4

A detailed consideration of punches, dies and other tools used in fashioning sheet metal. It is of interest to toolmaker, diemaker, tool draftsman or designer, and is excellently illustrated.

Dies || Punching machinery

2694 19–5945

Yates, Raymond Francis, 1895– ed. Model making; a practical treatise for the amateur and professional mechanic. Ed.2, rev. & enl. 1925. 428p. illus. Henley $3

A well written work detailing workshop practice, design and construction of reduced models of machines and contrivances. The second edition adds eight new chapters containing instructions for making models for a horizontal sundial, a steam yacht, a thirty-four-inch-spread monoplane, an electric launch, storage batteries for model boats, marine propellers, a railroad track and a passenger car.

Coal mines and mining

2699 20–3888

Ketchum, Milo Smith, 1872– Design of mine structures. 1912. 459p. illus. McGraw-Hill $5

A work complete in itself dealing with buildings and parts; but supplementing to some extent the author's *Design of steel mill buildings,* 4th ed. (1921. $6) and *Designs of walls, bins and grain elevators* (1919. $5)

Mine buildings

2700 12–14434

Peele, Robert, ed. Mining engineers' handbook. 1918. 2375p. illus. Wiley $7

The first comprehensive handbook in its field, including all branches of the subject and having topics dealt with by specialists; it contains valuable bibliographies.

Mining engineering

2701 18–11288

Richards, Robert Hallowell, 1844– and others. Text book of ore dressing. Ed.2, rev. 1925. 570p. illus. McGraw-Hill $5.50

A condensation for students' use of the author's *Ore dressing,* 4v. (1903. $20) the most authoritative and complete treatise on the theory and practice of ore dressing. Preferable to the larger work for the average library. The second edition has been brought up to date though considerably reduced in size (132p.) Flotation has been expanded into a separate chapter. The latest developments in crushing machines and practice are described. Graded crushing, coarse concentration by jigs, hydraulic classification, slime concentration on tables and vanners, operation data and detailed costs have been curtailed.

Ore dressing || Locke, Charles E., 1874– joint author || Bray, John Leighton, joint author

2702 25–12631

Ries, Heinrich, 1871– and **Watson, T. L.** Engineering geology. Ed.3, rev. 1925. 708p. illus. maps. Wiley $5

A comprehensive, clearly written discussion of on all features of geology of interest to the practicing engineer. The subject matter is well chosen and clearly presented and the book is well illustrated. A bibliography is given at the end of each chapter.

Geology, Economic || Watson, Thomas Leonard, 1871– joint author

2703 25–4183

Wilson, Eugene Benjamin, 1857– Hydraulic and placer mining. Ed.3, rev. 1918. 425p. illus. Wiley $3.50

A comprehensive, clearly written discussion of the methods and materials of placer and hydraulic mining; well illustrated. Since the 1907 edition some changes have been made in the work, mainly in the addition of information on placer prospecting, testing and valuation.

Hydraulic mining

2704 18–13162

Young, George Joseph, 1876– Elements of mining. Ed.2. 1923. 671p. illus. McGraw-Hill $6

A concise presentation of the principles of coal and metal mining. In the second edition the chapters on "Drilling for blasting purposes" and on "Rock breaking" have been rewritten; the one on "Transportation and hoisting" enlarged and other minor revisions made throughout the book.

Mining engineering

2705 23–3600

623 Military and naval engineering

623.8 Naval architecture. Shipbuilding

Barnaby, Sydney Walker. Marine propellers. Ed.6. 1921. illus. Spon $6.30

Founded upon a course of lectures delivered at the Royal naval college, Greenwich. The sixth edition has been largely rewritten. New chapters have been added on "Reduction or transmission gear" and "Propellers for aircraft" and the chapter on "Hydraulic propulsion" has been extended.

Propellers

2706 3–16264

Beard, Daniel Carter, 1850– Boat-building and boating. 1911. 190p. illus. Scribner $1.50

A practical work, describing boatmaking from a primitive raft to a motor-boat, with directions for tying knots and making sails. Excellent illustrations.

Boat-building

2707 11–26018

Holms, A. Campbell. Practical shipbuilding. 1918. 2v. illus. Longmans $22.50

A comprehensive treatise on the structural design and building of modern steel vessels, considered from the making of the raw material to the equipped vessel, including subsequent up-keep and repairs.

Shipbuilding

2708 25–14023

Hughes, Charles H., 1877– Handbook of ship calculations, construction and operation. 1918. 740p. illus. Appleton $6

A useful reference work for those engaged in building or operating ships, giving technical data, without theoretical calculations.

Shipbuilding || Naval architecture

2709 18–18420

MacBride, James Douglas, 1876– Handbook of practical shipbuilding. Ed.2. 1921. 356p. illus. Van Nostrand $3

A descriptive rather than technical work, dealing especially with merchant cargo ships. The language is simple and easy to understand. A good introduction to shipyard work.

Shipbuilding

2711 25–20522

Pagé, Victor Wilfred, 1885– ed. Motor boats and boat motors, design, construction, operation and repair. 1920. 524p. illus. Henley $4

A useful book written by experts upon the design and operation of several types of boats, including seaplanes. There are working instructions for building five boats, from sixteen to twenty-five feet in length, by A. C. Leitch.

Motor-boats

2712 20–11842

Patterson, Harold Wallace, 1875– Small boat building. (Outing handbooks) 1922. 144p. illus. Macmillan $1

Simple directions for amateurs, as to constructing and setting up various parts.

Boat-building

2713 24–15304

Riegel, Robert, 1890– Merchant vessels. (Shipping ser.) 1921. 257p. illus. Appleton $4

The fourth of a "Shipping series" on ocean shipping and transportation, complete in itself, intended primarily for use in evening classes, part-time schools, and for the student of transportation studying alone. A clear, non-technical description of the construction, types, uses and measurements of merchant vessels from an economic standpoint.

Merchant marine || Ships

2714 21–12518

Shaw, George Russell, 1848– Knots, useful and ornamental. 1924. 109p. illus. Houghton $2

While this book contains no text except the short introduction, the illustrations clearly indicate each process from the simplest knot to the most elaborate. In addition to the many seaman's knots some interesting ones from Japanese books are included.

2716 A22–1798

624 Bridges and roofs

Bland, Miles Carlisle, 1875– Handbook of steel erection. 1923. 241p. illus. McGraw-Hill $2.50

A collection of experience notes, discussions and stress analyses of various erection tools such as locomotive cranes, derrick cars, ginpoles, and miscellaneous equipment, giving typical examples of erection methods and convenient tables. Computations for several representative problems in building and bridge erection are given.

Building || Steel, Structural

2717 23–4550

Fowler, Charles Evan, 1867– Practical treatise on engineering and building foundations. Ed.4, rev. & enl. 1920. v.1, illus. Wiley $5

This fourth edition of the author's work on subaqueous foundations is to be issued in three volumes. So far only Volume one on ordinary foundations has appeared. It covers practically all engineering details relating to the construction of the substructures of bridges that do not involve open or pneumatic caissons or elaborate dredging.

Bridges || Foundations

2718 20–16618

Jacoby, Henry Sylvester, 1857– and **Davis, R. P.** Foundations of bridges and buildings. Ed.2. 1925. 665p. illus. McGraw-Hill $6

A comprehensive book covering the best practice of American engineers; it is illustrated with photographs, sketches, and diagrams and an annotated bibliography is included. References to special subjects in periodical literature are given. The second edition adds sixty-two pages, and has been brought up to date and reset throughout.

Foundations || Bridges || Davis, Roland Parker, 1884– joint author

2720 10–3366

Ketchum, Milo Smith, 1872– Design of highway bridges of steel, timber and concrete. Ed.2, rev. 1920. 548p. illus. McGraw-Hill $6

Covers the entire construction of highway bridges, including calculation of stresses, designs, estimates and contracts.

Bridges

2721 20–13876

—— Structural engineers' handbook. Ed.3, enl. 1924. 1065p. illus. McGraw-Hill $7

A valuable exhaustive work, primarily for reference, on design and materials of steel bridges and buildings, timber trestles, retaining walls, and other steel structures, including drafting and estimating. In the third edition about 130 pages have been added and considerable change made in the text, specifications and tables. The most important additions occur in the chapter on self-supporting steel stacks.

Bridges || Building || Steel, Structural

2722 24–21536

Swain, George Fillmore, 1857– Structural engineering. 1924. illus. McGraw-Hill $5

The first of a series of four texts treating of the theory and design of structures. It discusses the fundamental principles of the strength of materials applicable in the design of structures of various kinds; and also treats machine design. The second volume *Fundamental properties of materials* (1924. $2.50) brings together the fundamental properties, the constitution and physical structure, the importance and effect of various ingredients and the effect of different treatments of properties.

Structures, Theory of || Strength of materials

2723 24–24636

Waddell, John Alexander Low, 1854– Bridge engineering. 1916. 2v. illus. Wiley $12

A most comprehensive work, which treats of movable bridges in a general way; it does not aim to deal with the theory of stresses. The work otherwise is full, including business and ethical matters. A sequel to this work is the author's *Economics of bridgework* (1921. $6)

2725 17–14068

Manson, Arthur James. Railroad electrification and the electric locomotive. Ed.2. 1925. 332p. illus. Simmons $4

An outline of principles, a comparison of steam and electric locomotives, a history of electrification in the United States, and data on electrification in America, Europe and Australia are all included in this informative book which seeks also to make application of its discussion by giving examples of the practical solution of problems.

Railroads || Electric locomotives

2726 25–4109

Orrock, John Wilson, 1870– Railroad structures and estimates. Ed.2, rev. 1918. 579p. illus. Wiley $5

Estimates of quantities and costs of material for tracks, fences, crossings, culverts, bridges, water stations and shops, with brief descriptions of structures. The second edition is enlarged by about three hundred pages. The chapters have been rearranged and much new material added conforming

with classification of accounts as prescribed by the Interstate commerce commission, 1914.

Railroads

2727 18–2703

Prelini, Charles. Tunneling: a practical treatise. Ed.6, rev. & enl. 1912. 349p. illus. Van Nostrand $3

As entirely new methods have been introduced by professional men, it was found necessary to arrange the presentation of the subject in this sixth edition so as to give due prominence to these recent methods. Also greater attention has been given to American methods of excavating tunnels through rock and loose soil. Space also is given to important tunnels recently made to illustrate various methods described in the text.

Tunneling

2728 12–15448

Railway engineering and maintenance cyclopedia. 1926. 1072p. illus. Simmons $8

Gives definitions, descriptions and illustrations of the materials and devices employed in the maintenance of railway tracks, structures and signals, together with their applications and methods of use.

Railroads

2729 26–11432

Stanley, Frank Arthur, 1874– Railroad shop practice. 1921. 331p. illus. McGraw-Hill $4

Describes tools, equipment and methods used in railroad-shop repair work but is more a collection of shop kinks than a manual of general shop practice.

Railroads—Repair shops

2730 21–13878

Tratman, Edward Ernest Russell. Railway track and maintenance. Ed.4. 1926. 490p. illus. McGraw-Hill $4

A manual of maintenance-of-way and structures treating various subjects critically and descriptively. Gives general principles with numerous details of material, appliances and work and methods of practice, with drawings. Formerly published under title of *Railway track and track work.*

Railroads

2731 26–7171

Webb, Walter Loring, 1863– Railroad construction, theory and practice. Ed.7, rev. & enl. 1922. 847p. illus. Wiley $5

An excellent handbook containing an immense amount of valuable information. Covers railway work from the preliminary survey to the completion of the road. The seventh edition contains numerous corrections and revisions to make it conform to decisions of the American railway engineering association.

Railroads

2732 22–20055

Williams, Clement Clarence, 1882– Design of railway location. Ed.2, rev. 1924. 517p. illus. maps. Wiley $4

An interesting and comprehensive compilation of well arranged facts concerning economic factors underlying successful railway building and operation.

628.1 Water supply

Flinn, Alfred Douglas, 1869– and others, comp. Waterworks handbook. Ed.2. 1918. 824p. illus. McGraw-Hill $6

A valuable reference work, full and authoritative, on sources, distribution, treatment and general practice in water supply engineering for the use of the waterworks engineer, constructor or official. Some familiarity with engineering practice and the necessary sciences is presupposed.

Water-supply

2747 21–1246

Stein, Milton Frederick, 1885– Water purification plants and their operation. Ed.3, rev. 1926. 316p. illus. Wiley $3

The practical operation of small plants is presented in this book of instructions. It will appeal to the non-technical operator although certain phases have been treated with sufficient detail to be of use to the chemists in the plants. The changes in the new editions have dealt chiefly with methods and interpretation of tests.

628.2 Sewerage

Babbitt, Harold Eaton, 1888– Sewerage and sewage treatment. Ed.2, rev. 1925. 516p. illus. Wiley $5

Although designed as a textbook for the author's classes at the University of Illinois the treatment is so complete that it is of particular interest to city engineers and officials. Every phase is discussed—financing, increase of population, quantity of sewage, principles of the theory and design of systems, practical details of maintenance and various methods of sewage disposal. The second edition has been entirely revised and much new material added, particularly on activated sludge and the use of Imhoff tanks.

Metcalf, Leonard, 1870– and **Eddy, H. P.** American sewerage practice. Ed.2. 1916- 3v. illus. McGraw-Hill (see note)

Contents: v.1, Design of sewers, $6; v.2, Construction of sewers, $5; v.3, Disposal of sewage, $7.

This standard treatise gives a thorough and reliable survey of practical sewer design and construction. A one-volume work which covers the same field concisely is A. P. Folwell's *Sewerage*, 9th ed. (Wiley, 1922. $4) It has long been a standard with frequent revisions incorporating the newest practices.

2752 24–11446

Kinnicutt, Leonard Parker, 1854–1911 and others. Sewage disposal. Ed.2, rev. 1919. 547p. illus. Wiley $5

This unusually clear and concise presentation of the theories and fundamental principles of sewage treatment plant construction deals chiefly with methods and works conducted on a large scale. Though special attention is given American processes, valuable features of French and German practice are also considered. The second edition has been rewritten and new chapters added on two-story tank treatment, activated sludge, general considerations regarding design and operation of sewage treatment plant, and disposal of waste where no sewerage system exists.

628.4 Municipal sanitation

Hering, Rudolph, 1847– and **Greeley, S. A.** Collection and disposal of municipal refuse. 1921. 653p. illus. McGraw-Hill $7

The problems involved in the collection and disposal of garbage and other refuse materials are considered exhaustively, including systems and methods employed in this country and Europe. Capes and Carpenter's *Municipal housecleaning* (1921. $7) is on the same subject. It is practically a digest of the literature found in municipal reports. Many of the topics are presented in tabular form.

628.6 House drainage

Gerhard, William Paul, 1854– Sanitation, water supply and sewage disposal of country houses. Ed.2. 1914. illus. Van Nostrand $3

An authoritative work on domestic sanitation, which aims to establish leading principles rather than to give details of practice; it gives illustrated examples of water supply and sewage disposal installation under varying conditions. It has been written for the use of the layman and offers many valuable hints to householders.

628.9 Lighting

Cady, Francis Elmore, 1876– and **Dates, H. B.,** ed. Illuminating engineering. 1925. 486p. illus. Wiley $5

Based on a course of lectures given at the Case school of applied science, these papers discuss the principles underlying the production of light rather than their application. The lecturers were chemists, physicists and other specialists from the laboratories of industrial organizations. Another collection of papers on the same subject is *Illuminating engineering practice* (McGraw-Hill, 1917. $6) They are lectures delivered in a course presented under the joint auspices of the University of Pennsylvania and the Illuminating engineering society. Practical problems as well as principles are considered.

2757 25–3741

Luckiesh, Marion, 1883– Artificial light. (Century books of useful science) 1920. 366p. illus. Century $3

With a constant and contagious appreciation of the intimate connection of the art of lighting with human development, the author relates its history from the days of the first fire to those of the aeroplane signal light and the impressionistic stage. All of the problems of artificial illumination, scientific, economic and artistic are discussed in a non-technical readable style. The plates illustrate historic lighting devices as well as the results of modern research.

629 Other branches of engineering

Gillette, Halbert Powers, 1869– Earthwork and its cost. Ed.3. 1920. 1346p. illus. McGraw-Hill $6

Presents methods of handling earth that have proved successful and gives cost data so itemized that by proper rate substitution they may be used as cost formulas under all conditions. It seems to be true, as the author states, that this is the first published volume treating of earth economics in a comprehensive way so that it is of value in all engineering projects where earth excavation is necessary. The first edition was issued sixteen years ago; much has been retained as still basically

valuable and much new matter has been added where essential.

Earthwork

Fraser, Edward Smith, 1891– and **Jones, R. B.** Motor vehicles and their engines. Ed.2, rev. & enl. 1922. 374p. illus. Van Nostrand $2

This book deals with the mechanism and operation of motor vehicles, enters into details and is well illustrated. The authors were formerly instructors in the motor transportation course of the Coast artillery school. The second edition represents a complete revision of the first. Many of the chapters have been entirely rewritten, many new illustrations have been added and descriptions of obsolete types of machinery eliminated.

Ramsower, Harry Clifford. Equipment for the farm and the farmstead. (Country life education ser.) 1917. 523p. illus.
Ginn $3.60

The book was prepared primarily in the interest of the farmer to help him "make his work easier and his burdens lighter"; it therefore covers every phase of farm life connected with new methods and appliances. Farm plans, buildings, water and light supply, machinery, tools and ways of improvement are discussed. It also serves as a comprehensive textbook planned for the use of students in agricultural colleges.

Updike, Daniel Berkeley, 1860– Printing types, their history, forms, and use. 1922. 2v. illus. Harvard $15

A monumental work in which the author combines the wisdom of the ancient writers on typography with his own original ideas on the subject of printing types, so that it becomes both a book lover's book and a criterion for technical students. With over three hundred carefully selected and beautifully reproduced illustrations, the author follows the history of printing types in various countries, analyzing the characteristics that have made for the survival of each variety and deducing from them principles which he applies in a final chapter of suggestions as to the choice of types for a composing room. The outgrowth of lectures delivered at Harvard university by the author, who is head of the Merrymount press, Boston.

Tosdal, Harry Rudolph, 1889– Problems in sales management. Rev. ed. 1925. 850p. diagrs. Shaw $5

The problems have been selected with a view to bringing out the "high spots" in sales management and are all based upon the experience of actual business concerns. In the revised edition most of the problems are new, but the scope of the course remains the same, though there has been some change in arrangement. *Principles of personal selling* (1925. $4) is a discussion of the whole field of salesmanship. The author is professor of marketing in the Graduate school of business administration, Harvard university.

Howe, Harrison Estell, 1881– ed. Chemistry in industry. Ed.3. 1926. 2v. illus. Chemical found. $1 each

The various relations of chemistry to the industrial life of the United States presented in a fascinating manner by well-known, scientific men. Originally published in 1924 as a single book, it was found so useful that the present edition has added a second volume containing twenty-two chapters, each taking up a new industry which is considered by an authority in that field. An exceptionally fine reference work for both the chemist and the lay reader.

669.4 Lead

arn, Orlando Clinton, 1871– Lead, the precious metal. 1924. 323p. illus. Century $3

A popular account of the historical uses of lead, telling how it is mined and smelted, its characteristics and the many and varied uses to which it is put. Although non-technical the book is detailed in its description of the various processes by which it is combined with other products to make paint, glass, rubber and many other commodities. Illustrated with photographs and diagrams.

Lead

62 24–7206

ofman, Heinrich Oscar, 1852– Metallurgy of lead. Ed.18. 1918. 664p. illus. McGraw-Hill $7

The complete rewriting has made this classic practically a new book, retaining in the original form only the chapters on reverberatory smelting and German cupellation. Many dimensioned drawings and abundant footnote references. The author is professor of metallurgy at the Massachusetts institute of technology. His *Metallurgy of zinc* (1922. $4) is equally important.

Jones, William Unite. Button industry. (Pitman's common commodities and industries) 1924. 113p. illus. Pitman $1

This series, "Pitman's common commodities and industries," is worth consideration for it includes useful material on subjects about which little is published. Each volume is written by a practical man of business and follows the development of the commodity from its natural state until it becomes a commercial product. English practices are sometimes emphasized. The series comprises about a hundred volumes and includes such topics as brushes, cordage, cycles, player-pianos and straw hats. This volume on buttons is typical.

Babbitt, Irving, 1865– The new Laokoon. 1910. 258p. Houghton $2.50

The author expounds the pseudo-classical confusion in the arts—an objective and formal confusion related to Aristotelianism and scholasticism, and frequently found in terms of painting—and the subsequent romantic confusion, related to Platonism and impressionism and found in terms of music. He traces these confusions into their general intellectual manifestations outside the arts. Of special interest to the student of comparative literature and the arts.

Esthetics

3283 10–13464

Blake, Vernon. Relation in art, being a suggested scheme of art criticism. 1925. 325p. illus. Oxford $6

The first part is an analysis of the abstract nature of art as a form of thought; the second shows the coordination of the various thought-forms of different peoples and epochs with the technical implements of expression. A scholarly study of interest to those who have some acquaintance with modern philosophy and mathematical relativity.

Art criticism

Collingwood, Robin George. Outlines of a philosophy of art. (World's manuals) 1925. 104p. Oxford $1

Students of art and philosophy as well as general readers will welcome this brief discussion. The plan followed by the author is first to state a general conception of art; second, to develop that conception by means of its own details into a complete philosophy. A scholarly and comprehensive, if remarkably condensed work. The first chapter gives an admirable, clear and concise account of Croce's esthetic doctrine.

Symons, Arthur, 1865– Studies in seven arts. 1925. 324p. Dutton $3.50

The first fifteen of the twenty-eight essays in this volume were published in 1906 under the same title. The seven arts are painting, sculpture, architecture, music, handicraft, the stage with its branches, and dancing. The author sets forth the idea that a clear appreciation of the principle that the sensuous material of each art brings with it a special phase or quality of beauty, untranslatable into the forms of any other, an order of impressions distinct in kind, is the beginning of all true esthetic criticism. He illustrates the principle through a study of individual artists and works of art.

708 Art galleries. Museums

Addison, Mrs. **Julia de Wolf (Gibbs)** 1866– Boston Museum of fine arts. (Art galleries of America ser.) Rev. ed. 1924. 493p. illus. ports. Page $4

Less a guide than a small cyclopedia of information and gossip about the artists and comment on examples of their work to be seen there. The first edition appeared in 1910. This edition adds a chapter describing the important acquisitions since 1910. The finest collection of the museum is the Oriental exhibition. Other books in the series are Preyer's *Art of the Metropolitan museum of New York* (1909. $3.75) more of a reference book for examples of the fine and lesser arts in America than a guide to the galleries; and Henderson's *The Pennsylvania academy of the fine arts and other collections of Philadelphia,* (1911. $3.75) which pays special attention to early resident artists and to historical portraits, giving the work peculiar interest to students of American art. Very little criticism is attempted. Henderson's *Art treasures of Washington,* (1912) in the same series is out of print.

Gardner, Helen. Art through the ages. 1926. 506p. illus. Harcourt $4

A most valuable addition to the literature of the history of art has been given to us by the chief instructor in history of art at the Art institute of Chicago. Although the book has been written primarily as an introductory course it reads with all the atmosphere of delightful lectures. Its purpose is to cover architecture, painting, sculpture and the minor arts from the days of the glacial age in Europe through successive civilizations of the Near East, Europe, America and the Orient, to the twentieth century—the period of the last ten years being treated more prophetically than dogmatically in a section at the end of the volume. The illustrations are exceptionally fine as well as practical and no work seriously discussed is without illustrative material. The bibliographies at the ends of the chapters have been compiled with the well equipped but not specialized art library in mind. The appendix is a selected bibliography on esthetics, theory and practice and includes sources for procuring all kinds of illustrative material; also a glossary of technical terms. There is an excellent index.

Lethaby, William Richard. Mediæval art, from the peace of the church to the eve of the renaissance, 312–1350. (Library of art) 1913. 315p. illus. Duckworth; Scribner $3

A reprint of the 1904 edition. A survey of the two chief styles of the period, the Byzantine and western or Gothic, both historically and in their geographical distribution, presenting arguments and illustrating that the causes which underlie the Gothic art are to be found in a large infiltration of the Oriental spirit, and a new energy which shaped it to northern requirements. The diagrams and illustrations include sculpture and painting, but are mainly architectural.

Armstrong, Sir Walter, 1850–1918. Art in Great Britain and Ireland. (Ars una) 1909. 332p. illus. Scribner $3

The first of a General history of art series (Ars una) to be published simultaneously in English, French, German, Italian and Spanish. The present volume by the director of the National gallery of Ireland, a well-known authority on painting, is light and small enough for hand or pocket and in typographical dress similar to Reinach's *Apollo*. It is a vivacious and readable account arranged under topics, as architecture, minor arts, painting and sculpture, instead of in general chronological order. The illustrations include four color prints, several half-tone plates and numerous small but clear text illustrations. Bibliographies are given at the ends of the chapters.

709.85 Peruvian art

Lehmann, Walter, 1878– and **Doering, Heinrich.** Art of old Peru. 1924. 67p. illus. Benn 105s

A collection of beautiful plates of pieces of art selected because of their artistic importance or archeological significance, accompanied by notes which are intended to supply a chronological basis for their arrangement. The introduction gives a historical survey. There is a brief chapter on the "Land, people and monuments." Of the 140 plates, many of which are not elsewhere published, twelve are in brilliant colors. Mr. Lehmann is director of the Ethnological institute of the Berlin ethnographical museum. A lesser work emphasizing the archeological side is P. A. Means' *Survey of ancient Peruvian art,* Transactions of the Connecticut academy of arts and sciences, v.21 (Yale, 1917. $1.50) The seventeen plates at the end are in black and white.

Robinson, William. English flower garden and home grounds. Ed.13. 1921. 796p. illus. Murray; Scribner $7.50

This well-known standard work published in 1883 has been completely rewritten, and consists of two parts: the first dealing with the question of design, showing that the happiest design is the natural one that arises out of its site and conditions; the second part describes most of the best trees and plants, hardy and half-hardy. The plants are selected from point of view of adaptability to English conditions, but this is no bar to its use in America as so many plants are equally adaptable here. Illustrations are selected examples of

gardens in Great Britain and Ireland, and many are engravings on wood. A more expensive book but chiefly valuable for its illustrations is Tipping's *English gardens* (1925. $25) which describes fifty-two English gardens.

Mumford, Lewis. Sticks and stones. 1924. 247p. Boni & Liveright $2.50

The first part of the book is devoted to a survey of American architecture at various stages of our history, showing how a nation's architecture may serve as an index to its civilization. This discussion leads inevitably to an indictment of the skyscraper and the tenement, symbols of an age which places mechanical skill above architectural genius. A provocative study written in an admirably lucid and smooth-flowing style.

Adams, Henry, 1838–1918. Mont-Saint-Michel and Chartres; introd. by R. A. Cram. 1913. 401p. illus. Houghton $7.50

Through the instrumentality of the American institute of architects this valuable work privately printed in 1904 became available to all readers. The most apt characterization has been given in the introduction by Ralph Adams Cram: "Everyone who has seen Chartres or Mont. St. Michel or the glory of a rose window or of Gothic art in any form, will feel upon reading this work that he has come home to all he would have said and all he felt concerning this splendid type of religious architecture. The author's knowledge of feudalism, guilds, crusades; of communes, of nationalities, sculptors, divines, musicians, and builders, the minutiae of great and widely differentiated art weaves brilliant threads throughout the volume."

A fairly complete picture of the development of domestic architecture in France from the end of the fourteenth to the middle of the seventeenth century, ranging in character from the citadel of a royal borough to the country seat of a minister of state, from a fortified monastic establishment to a burgher's residence, having no one principle in common. It does not include humble dwellings, the cottages of the peasantry nor the houses of the urban artisan and shopkeeper. It is a folio volume made up of handsome plates, with 380 illustrations which are fully described in the text, and something told of the builders and guardians of the houses. The introduction is an appreciation of the technical and architectural details of the buildings described.

Barnard, Harry. Chats on Wedgwood ware. (Books for collectors) 1925. 260p. illus. port. Unwin; Stokes $4

The author has made a good story of Josiah Wedgwood—his boyhood, ambitions, and endless efforts to make a beautiful product—and is keenly alive to the romance of his subject. Considerable technical information of value to collectors is presented, with many excellent illustrations. An authoritative but expensive and more elaborate work is that of Burton's, *Josiah Wedgwood and his pottery* (Cassell, 1922. $25) which presents a clear and simple survey of Wedgwood's work as a potter and organizer of labor in pottery-working, his influence on the expansion of the industry and the activities of the principal contemporary potters in North Staffordshire. It also gives methods, designs and formulas. The author was chemist to Wedgwood for five years. The photographs include 32 color, and 72 black and white plates.

Still the best theoretical account of the science of linear perspective in English. It is enlarged from articles in the *American Architect and Building News.* Its suggestions will be as applicable in the work of a landscape painter or the historical painter as that of the architect. It first appeared in 1882. In this edition the text is revised and an appendix has been added with notes on the plates, illustrating oblique and parallel perspective and other problems.

Bement, Alon, 1878– Figure construction. 1921. 124p. illus. Gregg $2.50

"A brief treatise on drawing the human figure, for art students, costume designers, and teachers, with illustrations of four-minute drawings by students, supplemented by photographs and drawings by the old masters."—*Subtitle.* It reduces the profile figure to its two fundamental lines, making each additional essential line so simple that any student can follow it with excellent results. It will be particularly useful to costume designers and to those who cannot attend a life class, for it has been based on work in costume design classes in Teachers college, Columbia university.

Dunlop, James M. Anatomical diagrams for the use of art students. 1926. 72p. illus. Macmillan $3

The two sets of considerations dealt with which are most important to the artist are, the part played by the skeleton in determining the external form, and the extent and attachments of superficial muscles together with the disposition of the muscular fibres. The facts are brought out with diagrammatic simplicity and precision illustrated in a manner of extreme value and assistance to the student.

Hatton, Richard George, 1864– Figure drawing. 1924. illus. Scribner $4.50

From the standpoint of artistic anatomy this is one of the most complete books of its kind. It

contains a full description and explanation of the muscles and parts of the body with reference to drawing and modeling. The information is very definite and clear in detail and the presentation interesting. First published in 1907. A companion book is the author's *Figure composition* (1923. $2.75) which was first published in 1905 and has had several editions.

Berg, Edward and Kronquist, E. F. Mechanican drawing problems for high schools, normal schools and vocational schools. 1922. 223p. illus. diagr. Manual arts $1.28

A well arranged, clearly illustrated set of problems designed to cover the year's work. Crawshaw and Phillip's *Mechanical drawing for secondary schools* (Scott, 1916. $1.60) is a textbook presented in sections, such as perspective sketching, orthographic sketching, blue-printing and advanced cabinet drawing with problems representing commercial industrial practice.

Bishop, Calvin Collier. Electrical drafting and design. 1924. 165p. illus. diagr. McGraw-Hill $2

A series of problems is presented, valuable for the home study worker because they are similar to those actually handled in an office. The problems require the equivalent of a two-year course in mechanical drawing, involving lettering, projection, working to scale, inking and tracing, in addition to good working knowledge of electricity, covering circuits, machines, underwriters' requirements and some practical knowledge of wiring.

Brahdy, Joseph. Blueprint reading, for the machine shop and related trades. 1923. 108p. illus. diagr. Van Nostrand $2.50

The most complete work of its kind. It teaches enough practical drawing to fix principles firmly in the reader's mind. There is a large number of facsimile blue-prints with searching questions concerning their details. The make-up is unusually attractive. A book not so detailed nor so comprehensive is Given's *Blue-print reading and shop sketching for the metal trades* (Wiley, 1924. $1.75) which is intended for the workman who handles and must use drawings, not for the maker of the drawings themselves. A simpler text is Shallenberger's *Reading blueprints* (Manual arts, 1924. 85c) designed as a brief text for teachers in night schools. It does not presume any knowledge of mechanical drawing and does not intend to teach any, but rather to supply the untrained workman with a means of interpreting a blue-print regardless of how it is made. A book of the correspondence type with more self-instruction is Fairfield's *Blueprint reading* (Amer. technical soc., 1920. $2) published in the same volume with Kenison and Waites' *Mechanical drawing.*

Svensen, Carl Lars, 1884– Essentials of drafting. Ed.2, rev. 1923. 194p. illus. diagr. Van Nostrand $1.75

The first edition of this text and problem book for trade and evening schools was published in 1918. Its general aim is technical education in drawing. Simply written, the chapters on screw-threads and bolts and screws are especially well done, so that a boy can use them intelligently. All the questions and problems are placed in a final chapter to be used at the discretion of the instructor. In this edition many of the illustrations have been redrawn or changed, the chapters on orthographic projection have been made more complete and other chapters have been expanded.

745 Ornamental design: Woven fabrics, rugs, wall-paper

Ackerman, Phyllis. Wallpaper, its history, design and use. 1923. 268p. illus. Stokes $3.50

The decorative qualities of wall-paper through its historical development and its present mechanical production are considered from the standpoint of good design and appropriate use. It forms a work of alluring make-up for the antiquarian and craftsman, beautifully illustrated. A more expensive work with elaborate plates is McClelland's *Historic wall papers* (Lippincott, 1924. $25) which is a comprehensive history with an especially interesting chapter on some famous scenic papers and their owners. It contains lists of wall-paper designers, manufacturers and dealers, a list of French fabricants and their designs, and a bibliography.

Head, Mrs. **R. E.** Lace and embroidery collector. (Collectors ser.) 1922. 252p. illus. Dodd $3

The book is designed for the collector of small means. After an introductory chapter on the development of lace, the laces of various countries are described, with their uses in relation to costume and instructions for the identification of old laces. Embroideries and needlework are chiefly considered chronologically with a special chapter on samplers. There are illustrations of all the laces described, with a glossary of terms and a bibliography. Robert's *How to know laces* (Dry goods economist, 1925. $1.50) describes twenty-four different laces besides seven kinds of point laces. The last chapter covers sixteen embroideries and gives a short dictionary of lace terms. Includes clear illustrations of many. Something of the history of the laces is included in this brief work.

Lenygon, Francis. Furniture in England from 1660 to 1760. 1914. 300p. illus. Batsford; Scribner $20

This authoritative work is especially useful in the art reference library. It is made up of many full-page illustrations from special photographs of furniture from historic mansions and public and private collections, showing the renaissance spirit in England at its height. The different objects are treated separately but broadly. The text describes the influence of the architect, the social history and influences from the continent. A companion volume is his *Decoration in England, from 1660-1770* (1915. $20) which treats the decorative arts in the same manner. Similar volumes are Margaret Jourdain's *English decorative furniture of the early renaissance, 1500-1650* (1924. $25) and *English decoration and furniture of the later eighteenth century, 1760-1820* (1922. $25) All of these volumes are in "Batsford's library of decorative art." Another expensive collection of plates is Percy Macquoid's *History of English furniture,* 4v. (Putnam, 1904-1908. $18.75 each) They are grouped in volumes according to the kind of wood used—oak, walnut, mahogany, and satinwood. Mr. Macquoid is also issuing a *Dictionary of English furniture from the middle ages to the late Georgian period* (Scribner, 1924. $35 each). It is going to be a comprehensive history in an alphabetical arrangement. The handsome full-page illustrations are a feature. Two of the three volumes are off the press.

Witt, Robert Clermont, 1872– How to look at pictures. New ed. 1921. 183p. illus. Harcourt $2.50

A useful and popular book emphasizing the point of view of the artist and the subject the picture represents. It gives suggestions on how to note the light and shade in a painting, the composition of the picture, and the methods and materials of a painter, in all varieties of paintings. Intended for those who have no special knowledge of pictures and paintings. The first American edition was published in 1906. This is a reprint, with an additional chapter on How to show pictures.

Woodbury, Charles Herbert, 1864– Painting and the personal equation. 1919. 195p. Houghton $2

Although the book falls into three parts—The painter; The student; The public—the larger part is addressed to the student as the substance of six lectures given at Ogunquit, Maine in connection with a course of instruction in outdoor painting. Suggestion and impression are the points stressed in the author's philosophy of art which is happily free from pedagogic directions. The author seeks to show that because the painter deals with sensations they have great influence in his life, and that therefore he must feel his responsibility for directing his mind along orderly and constructive lines so that his appreciative taste will be the best.

751 Materials and methods

Boreau-Vauthier, Charles, 1857– Technique of painting. 1912. 260p. illus. Heinemann; Putnam $5

A helpful book, especially for the beginner in oil painting, which traces the technique of painting from prehistoric times, discussing all the known processes, ancient and modern, and giving valuable suggestions as to injuries, diseases and preservation of paintings and the deterioration of colors. The plates, some in color, illustrate methods by reproduction of small sections of old paintings.

Rich, Alfred William, 1856– Water colour painting. (New art library) 1918. 256p. illus. Seeley; Lippincott $6

A valuable work for art students, by a distinguished water-colorist, proceeding from elementary instruction onward to the difficulties of complicated work from nature. Well-known masters are considered and the author's personal convictions and points of method are apparent. Several chapters are given to describing the parts of England best suited to this art. There are many beautiful reproductions of the masterpieces of the old English water-color school.

Ross, Denman Waldo, 1853– On drawing and painting. 1912. 214p. Houghton $3.50

A book for the art teacher and professional painter, presenting the writer's personal theories with regard to art in general, color, and working with the set-palette used by the old masters. While thoroughly modern in his scientific approach to art study, he urges the classic point of view. The author is lecturer on the theory of design at Harvard university. A supplementary volume is *Painter's palette* (1919. $1.50) devoted more exclusively to a single problem, the method of setting the palette, the system of the spectrum band in corresponding values.

Solomon, Solomon Joseph, 1860– Practice of oil painting and of drawing as associated with it. Ed.2. 1910. 277p. illus. ports. Seeley; Lippincott $6

This valuable monograph covers a series of lessons dealing with the treatment of the human figure in drawing, and tone values in painting, and analyzes paintings of the great masters to illustrate their methods. The author, a noted figure painter and teacher in the British royal academy, is authoritative in his teaching method. It will be useful to teachers and students and an aid to amateurs in judging pictures from a technical point of view. The excellent illustrations are reproductions of drawings and paintings cited in the text.

Painting—Technique

Speed, Harold. Science and practice of oil painting. (Universal art ser.) 1924. 275p. illus. Chapman; Scribner $7.50

A text which is about equally divided between art criticism and the craft of the painter. Its viewpoint is a combination of conservatism and modernism. Though of particular value to the student for its clear information of a purely technical nature on oils and pigments, and for the lists of color used by eminent painters, the book is extremely readable. There are sixty-one illustrations.

Tilney, Frederick Colin. Appeal of the picture. 1915. 314p. illus. Dent; Dutton $3.50

A book of well thought out information for the artist and picture lover. The writer who has the gift of art-teaching considers first the reasons for the public's lack of appreciation and then discusses some of the principles and technicalities of painting, such as subject-matter, color and composition, realism and idealism, background and photography.

Bailey, Albert Edward. Art studies in the life of Christ. 1917. 221p. illus. Pilgrim $2

A cheaper edition of *Gospel in art* (1916) A work identifying 1227 pictures relating to the life

of Christ, with 132 reproductions in chronological order, an interpretative text, and a short biography of painters. The introduction gives helpful suggestions on how to study pictures. It is intended for club work and Sunday-schools. The plates and critical matter in this edition are identical with the previous work, but in place of an exposition of each picture there is a series of questions calculated to lead the student to an intelligent appreciation of values. Plates are printed in black and white, margins narrow, paper not very good.

East, Alfred, 1849–1913. Art of landscape painting in oil colour. 1908. 107p. illus. Lippincott $6

This is a technical treatise for students, dealing with color, composition, skies, trees, grass and painting materials. A work not quite so technical is Harrison's *Landscape painting* (Scribner 1909. $2.50) It is made up of informal talks given before the summer school of the Art students' league on color, composition, quality, pigments and other matters pertaining to the technique of landscape painting. The book contains much sound advice and useful criticism. Twenty-four pictures by modern painters, reproduced in black and white are given as illustrative examples. Several of the chapters appeared in magazines.

759 Schools of painting

ddy, Arthur Jerome, 1859– Cubists and post-impressionism. Rev. ed. 1919. 253p. illus. McClurg $5

This defence of modern art is intended to present its use in the development of art in general. It defines these movements and sets forth the point of view, with clarity and cleverness, with enthusiasm and yet without undue partisanship. It contains about seventy reproductions of noted cubist and post-impressionist pictures, partly tipped in on colored mounts, and gives a full bibliography. It was first published in 1914.

761 19–19061

arriott, Charles, 1869– Modern movements in painting. (Universal art ser.) 1921. 268p. illus. Chapman; Scribner $7.50

The chapters on naturalism, impressionism, post-impressionism and futurism give meaning to the queer and interesting things modern artists are doing. The methods of artists from Turner to the present day are described, without criticism and often apparently on the basis of first-hand information obtained in conversation with them. Interesting to read and useful for reference because of the large number of painters mentioned. Includes one hundred excellent illustrations of their work.

Bode, Wilhelm, 1845. Great masters of Dutch and Flemish painting; tr. by M. L. Clarke. (Library of art) 1926. illus. Scribner, In press

This is an illuminating critical survey of the work and significance of Rembrandt and his contemporaries, by the former director of the Royal gallery at Berlin. It includes several reproductions of paintings. This volume is a reprint of the 1909 edition which was translated from the second and revised edition of Dr. Bode's *Rembrandt und seine Zeitgenossen.* Caffin's *Story of Dutch painting* (Century, 1909. o.p.) gives more biographical, historical and descriptive information than Bode but is less valuable for criticism.

Marius, G. Hermine. Dutch painting in the nineteenth century; tr. by Alexander Teixeira de Mattos. 1908. 203p. illus. port. Lippincott o.p.

The arrangement is chronological under tendencies and schools. Each artist's work is characterized separately, tracing formative influences and making brief comparisons, and there is little use of generalization and formula. The numerous illustrations are excellent reproductions of the works of the artists in the text.

Meier-Graefe, Julius, 1867– Vincent van Gogh, a biographical study; tr. by J. H. Reece. 1922. 2v. illus. Medici soc. $17.50

"Meier-Graefe's study is a unique achievement in the literature of biography. With an art that is of the rarest quality, he has created out of the stuff of Van Gogh's letters to his friends and to his brother a living being, who must now go on living as long as literature will be read." The illustrations after the works of the artist, over one hundred in number, and the make-up, make the book a work of art.

Valentiner, Wilhelm Reinhold, 1880– Art of the Low Countries; tr. by M. G. Van Rensselaer. 1920. illus. De La More 10s6d

A collection of historical and critical essays on the art of Holland and Belgium that combine original research and minute erudition with fineness of taste and appreciation. The translation reads with the grace of an original. It is both a learned and a humane book. It contains eighty-four illustrations, mostly from out-of-the-way originals, bibliographic notes, and lists of works in some American collections.

inyon, Laurence, 1869– Painting in the Far East. Ed.3, rev. 1923. 297p. illus. Arnold; Longmans $10

An interpretation of the achievement and aims of oriental painting and an appreciation of it from the standpoint of a European, in relation to the rest of the world's art. It follows the course of Chinese and Japanese painting from the fourth to the new movements of the eighteenth and nineteenth centuries. The author bases his work largely on knowledge gained in the British museum and some private collections of the work of particular artists. His general historical outline and statement of guiding principles are excellent. It is illustrated with 30 collotypes. The first edition appeared in 1908, and was bound with moire velours; this edition is serviceably bound in cloth. It incorporates some new matter on early Chinese painting and chapters on Ukiyo-yé and the color-print and a few new illustrations.

A useful manual for the beginner or practical worker, by an experienced etcher, with many examples of his work and that of others. It is similar in purpose to Reed's *Etching* (Putnam, 1914. $3.50) although Plowman, which first appeared in 1914, in matter and manner of treatment is better suited to the general reader, covering a much wider field, including chapters on drawing, lithography, and other topics related to etching. The new edition is brought up to date and adds new illustrations. A briefer manual, Plowman's *Manual of etching* (Dodd, 1924. $2) confines itself to etching alone and is designed expressly for the beginner. Both titles include lists of tools, addresses for obtaining materials and bibliography. Attractively illustrated with reproductions of etchings by the author.

Mason, Daniel Gregory, 1873– Appreciation of music series. 1907-1921. 5v. illus. ports. Novello; Gray $1.50 each

A series of volumes on the appreciation of music from the listener's standpoint, which is very useful to students. The first in the series, Surette and Mason's *Appreciation of music* (1908. 7–38040) treats of the development of musical forms from primitive sounds to Beethoven's symphonies and analyzes examples. A piano is necessary for the proper understanding of the examples. The second, Mason's *Great modern composers* (1916. 16–5907) includes brief biographical sketches of fourteen musicians from Schubert to Strauss, and analyzes one or two of the best works of each. The third, Mason's *Short studies of great masterpieces* (1918. 18–3264) analyzes twelve selected studies from as many composers, and is prepared for the special music student. The fourth, his *Music as a humanity* (1921. 18–3264) is a group of essays under the headings: Of universities and the public taste; Of festivals and patrons; Of esthetics and psychology; it is more abstruse than the other volumes. The fifth is his *Student's guide to music* (10–8264) issued first as *Guide to music for beginners* (Baker 1910) and also under title *Child's guide to music.*

The reader will find herein: (a) a historical and theoretical essay on the formation and the nature of "modern" music and its evolution; (b) a selection of 100 "perfect cadences" from the fourteenth century to the present day, arranged in chronological order and with comments illustrating as completely as possible the history of modern polyphony and the slow, gradual transformation of the traditional diatonic system into chromaticism. The development of the subject in brief, terse, but comprehensive paragraphs makes the mental picture extremely clear and an understanding of the progression certain. The text is in Italian, French and English.
